Subject: Correction to BASF Corporation 8(e) submission of April 25, 1995. Results of a Full-Scale Prenatal Toxicity Study with 2-Butyne-1,4diol (CAS. No. 110-65-6).

On April 25, 1995 BASF Corporation submitted the results of a full-scale prenatal toxicity study in Wistar rats. The submission contains a typographical error which needs to be corrected. The incorrect information appears in the first paragraph of page 2. The intermediate dose is indicated as 80 mg/kg body weight, the correct value is 40 mg/kg body weight.
