Re: Toxic Substances Control Act -- Section 8(e)

Dear TSCA Section 8(e) Coordinator:

This letter provides a correction to the September 9, 2002, letter from the Acetophenone Task Force (ATF), c/o Mr. William J. Moffatt, JLM Chemicals, Inc., 3350 West 131st Street, Blue Island, Illinois 60406-2365, to the U.S. Environmental Protection Agency (EPA), regarding its submission, pursuant to Section 8(e) of the Toxic Substances Control Act (TSCA), of preliminary results of an Organization for Economic Cooperation and Development (OECD) 422 Combined Repeated Dose Toxicity Study and Reproduction/Developmental Screening Study in Sprague-Dawley Rats with Acetophenone (CAS No. 98-86-2). In its letter, the ATF stated, in part: "There was one incidence of postdose salivation in the females in the 225 mg/kg/day group." That sentence should read: "There was one incidence of postdose salivation in the females in the 75 mg/kg/day group."

Any subsequent information regarding this chemical from this study that is considered to present a substantial risk to human health or the environment under TSCA Section 8(e) will be submitted to EPA.
