RE: 8EHQ-0191-1150-C

Dear Sir or Madam:

On January 2, 1991, Aristech Chemical Corporation submitted to the Agency a substantial risk notice because of information contained in a "Draft Report on a Subchronic (4-week) Dietary Oral Toxicity Study of Di(isononyl) phthalate in B6C3F1 Mice". In that notice we claimed our company identity as Confidential Business Information, and provided confidential and sanitized versions of the document. Through discussion with EPA, we have now elected to declassify the previous confidentiality claim, with this exception: We continue to claim the identities of company personnel mentioned in this document as confidential. To maintain this confidentiality claim, we have provided both confidential and sanitized versions of this letter.

If you have any further questions regarding this matter, please contact me.

Sincerely,

cc: Mr. Scott Sherlock (TS-793)
