Dear Sir or Madam:

**RE: 8EHQ-0694-13085A**

This letter is in response to your request for TSCA end use information and information for evaluating the exposure potential of 4-hydroxyacetophenone oxime (CAS No. 34523-34-7).

This chemical is a site limited isolated intermediate in a process where the end product will have TSCA uses. The potential for exposure to 4 HAP-oxime which is a solid material is minimal. The process utilizes a closed system which includes an inline storage vessel for 4 HAP-oxime. Potential exposures may occur during maintenance and occasional sampling via a sample port.

This submission contains no confidential business information.

If any further information is required, do not hesitate to contact me.

Sincerely,

*Michele R. Sullivan*
