Dear Roberta:

Per our recent phone conversation, the ITC is in a preliminary stage of review on a number of chemicals. One chemical that ITC would like updated production information about is, 4 Nitro diphenyl amine (CAS 836-30-6)

1. Monsanto is a current manufacturer.
2. The Monsanto plant is Krummrich located in Sauget, Illinois.
3. The production volume (1985 basis) is 10 - 50M lbs/year.

I would appreciate being kept informed of ITC's disposition of this material. If additional information would be helpful to ITC, please let me know.

Sincerely,

*J. R. Condray*
