Re: TSCA 8(e) Submission for Ecotoxicity Studies on poly(oxy-1,4-butanediyl), .alpha.-hydro-.omega.-hydroxy-, CASRN 25190-06-1

Dear Sir:

INVISTA is submitting results from three aquatic toxicity studies conducted on poly(oxy-1,4-butanediyl), .alpha.-hydro-.omega.-hydroxy-, CASRN 25190-06-1. The studies were aquatic toxicity studies on two different molecular weight products as follows:

- Static, Acute, 96-hour LC₅₀ to Zebrafish, *Danio rerio* (OECD 203) with 1,000 molecular weight material indicated an LC₅₀ of 14.2 mg/l.
- Static, Acute, 96-hour LC₅₀ to Zebrafish, *Danio rerio* (OECD 203) with 650 molecular weight material indicated an LC₅₀ of 5.9 mg/l.
- 96-hour LC₅₀ to Fathead Minnows with 1,000 molecular weight material had an LC₅₀ of 7.8 mg/l.

This report is being submitted in accordance with TSCA Section 8(e) guidance. No determination was made as to whether the findings in these studies represent significant health or environmental risks. If any additional information is required, please contact us.

Sincerely,

William Lesko, PE
