RCRA/SUPERFUND HOTLINE SUMMARY

JULY 84

7. A drum of listed wastes is dumped into an on-site wastewater treatment facility at a laboratory operation. Is this covered by the lab exclusion in §261.3(a)(iv)(E)?

This activity is not covered in the lab exclusion. §261.3(a)(iv)(E) was meant to cover small amounts of wastes added essentially unavoidably to large volumes of process wastewater. Examples include laboratory spills washed into a sink drain, and residues from the washing of glassware which are carried in the washwater into the sewer.
