

The February 15, 1984, Federal Register contains an advance notice of proposed rulemaking (ANPRM) addressing land disposal issues.

QUESTION: Does this ANPRM ban the land disposal of small quantity generator (SQG) wastes?

ANSWER: No. The ANPRM does not specifically address the issues of land disposing of SQG wastes. In addition, it is not clear how Congress intended to handle this issue in either of the RCRA reauthorization bills now pending. The caller is strongly encouraged to comment on the proposed rulemaking.
