

Question: If a solid waste later becomes regulated by the Agency as a hazardous waste, does the compliance period (under 264.96 [a]) include the time, when disposal of the solid waste occurs? What if you dispose of municipal waste and later decide to dispose of hazardous waste?

Resolution: The compliance period is the number of years equal to the active life of the waste management area (including any waste management activity prior to permitting, and the closure period). "Any waste management activity" includes both situations described.
