

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

SEPTEMBER 14, 1993

MEMORANDUM

SUBJECT: Proposal to Apply Debris Treatment Standards to Debris  
Contaminated With Phase II Wastes

FROM: Richard Kinch, Chief  
Waste Treatment Branch

TO: The RCRA Docket for the Phase II Land Disposal  
Restrictions Proposed Rule, Docket # F-92-CS2P-FFFFF

EPA made an inadvertent omission when preparing the preamble of the Land Disposal Restrictions for Newly Listed and Identified Wastes and Hazardous Soil (Phase II)-- Proposed Rule. The Agency did not specifically propose to apply the alternative debris treatment standards promulgated in the Phase I rule (August 18, 1992, 57 FR 37194) to debris contaminated with wastes for which treatment standards are being proposed in the Phase II proposed rule. The Agency is proposing that the alternative debris standards will apply to debris contaminated with organics displaying the toxicity characteristic (D018-D043), with chlorotoluene production wastes (K149-K151) and with coke by-product production wastes (K141-K145, K147, K148).
