Approval and Promulgation of Implementation Plans; Vermont; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects errors in a table which summarizes approval actions already taken to incorporate Vermont Air Pollution regulations into the State Implementation Plan (SIP). The table was published November 23, 1984 (49 FR 48141) and is located at 40 CFR 52.2381.

FOR FURTHER INFORMATION CONTACT: Beth M. Hassett, FTS 223-4880; (617) 223-4880.

SUPPLEMENTARY INFORMATION: On November 23, 1984, EPA published a table identifying Vermont regulations which have been submitted to and adopted by EPA as revisions to the Vermont State Implementation Plan (SIP). This table was for informational purposes only and did not have any independent regulatory effect. The table,

located at 40 CFR 52.2381, incorrectly listed information for Subchapter V of the Vermont SIP. For sections 5-501 and 5-502, the original section entitled "Comments" inaccurately listed or omitted State regulations which are not federally approved. This notice corrects these errors and prints Subchapter V in its entirety.

SUPPLEMENTARY INFORMATION:

I. Background

On May 29, 1984, the State of Idaho Department of Health and Welfare (IDHW) officially submitted to EPA a revision to the carbon monoxide (CO) SIP for the Boise-Ada County area. The plan included the implementation of a

mandatory inspection and maintenance (I/M) program on August 1, 1984. This program successfully started on that date. On September 18, 1984 (49 FR 36511), EPA proposed to approve the revision. Additional material was then submitted on January 3, 1985 and March 25, 1985. Today's action gives final approval to that Boise-Ada County CO SIP revision. Additional background information and plan description can be found in the September 18, 1984 proposed rulemaking.

II. Response to Comments

No comments were received.

III. Summary of Rulemaking Action

With this notice EPA is approving the 1984 Boise CO attainment plan and establishing a new attainment date of December 31, 1986. This approval is based on review of the SIP revision submitted by the IDHW to EPA on May 29, 1984 and additional material submitted on January 3, 1985 and March 25, 1985.

[Docket HM-193, Amt. No. 173-188]
Tritium and Carbon-14; Low Specific Activity Radioactive Materials Transported for Disposal or Recovery
AGENCY: Materials Transportation

Bureau, Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: The Materials Transportation Bureau (MTB) is amending § 173.425 of the Hazardous Materials Regulations (HMR) to except certain low specific activity radioactive materials containing tritium (hydrogen-3) or carbon-14 from most requirements of the HMR when the materials are being transported for disposal or reclamation. This amendment allows the shipment of

waste materials such as scintillation counting media, animal carcasses and tissue containing not more than 0.05 microcuries per gram (1.9 megabecquerels per kilogram) of tritium or carbon-14 without further consideration of their radioactive hazards. This action is consistent with the Nuclear Regulatory Commission (NRC) provisions specified in new section 20.306, Title 10, Code of Federal Regulations relating to the disposal by NRC licensees of tritium and carbon-14 low specific activity radioactive materials.
