

1. Is the mixing zone in a spawning area?

The location and time of a spawning area and mitigation standards are determined by:
18 AAC 70.240(j)

Dept. of Fish and Game
for Special Areas
listed in AS 16.20

Dept. of Natural Resources
for waters listed in
Anadromous Waters Catalogue

Dept. of Environmental Conservation
(in consultation with DNR)
for all other waters

6. Are any of the following species spawning?

Arctic grayling; northern pike; lake trout; brook trout; sheefish; burbot; landlocked coho salmon, Chinook salmon, or sockeye salmon; or anadromous or resident rainbow trout, Arctic char, Dolly Varden, whitefish, or cutthroat trout.

18 AAC 70.240(f)

YES

NO

7. Are aquatic life criteria exceeded, or will there be adverse effects to the capability of the area to support future spawning, incubation, and rearing?

Mixing zone must comply with other provisions
18 AAC 70.240(a) thru (f) and .240(k) thru (m)

YES

NO

8. Do you have a mitigation plan approved by the appropriate Department (see question 1)?

Mixing zone must comply with other provisions
18 AAC 70.240(a) thru (f) and .240(k) thru (m)

YES

NO

Mixing zone must comply with other provisions
18 AAC 70.240(a) thru (f) and .240(k) thru (m)

Mixing zone prohibited.
