

Illinois Environmental Protection Agency

Public Notice

Proposed Significant Modification to the Clean Air Act Permit Program
Permit for
Rexam Beverage Can Company in Chicago

Rexam Beverage Can Company has requested a revision to the Clean Air Act Permit Program (CAAPP) permit issued by the Illinois Environmental Protection Agency (Illinois EPA) regulating the air emissions from its beverage can manufacturing facility located at 1101 West 43rd Street in Chicago. The permit is being revised to more accurately clarify the non-major status of the facility for hazardous air pollutants (HAP) by establishing new federally enforceable limits in Condition 5.6.2. The revision is considered a significant modification to the permit. The Illinois EPA is accepting comments on the revisions to the permit. Comments must be postmarked by midnight July 23, 2005. If sufficient interest is expressed in a permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, P.O. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, Title V, Significant Modification). These documents and the application are available at the Illinois EPA's offices at 9511 West Harrison in Des Plaines, 847/294-4000 and 1340 North Ninth St., Springfield, 217/782-7027 (for either location, please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The CAAPP is Illinois' operating permit program for major sources of emissions, as required by Title V of the Clean Air Act. The conditions of CAAPP permits are enforceable by the public, as well as by the USEPA and Illinois. CAAPP permits may contain new and revised conditions established under permit programs for new and modified emission units, pursuant to Title I of the federal Clean Air Act, thereby making them combined Title V and Title I permits.
