

217/782-2113

FEDERALLY ENFORCEABLE STATE OPERATING PERMIT - REVISED

PERMITTEE

CTI Industries Corporation
Attn: Rick Sherman
22160 North Pepper Road
Barrington, Illinois 60010

Application No.: 95090158

I.D. No.: 097803AAB

Applicant's Designation: PRINTING

Date Received: July 29, 2002

Subject: Commercial Printing

Date Issued: October 22, 2002

Expiration Date: May 2, 2005

Location: 22160 North Pepper Road, Barrington

This permit is hereby granted to the above-designated Permittee to OPERATE emission unit(s) and/or air pollution control equipment consisting of two flexographic presses, plate making operation, two laminators/coaters, and two Corona arc treaters pursuant to the above-referenced application. This Permit is subject to standard conditions attached hereto and the following special condition(s):

- 1a. This federally enforceable state operating permit is issued to limit the emissions of air pollutants from the source to less than major source thresholds (i.e., 25 tons/year for volatile organic material (VOM), 10 tons/year for any single HAP, and 25 tons/year for combination of HAPs). As a result the source is excluded from the requirement to obtain a Clean Air Act Permit Program (CAAPP) permit. The maximum emissions of this source, as limited by the conditions of this permit, are described in Attachment A.
- b. Prior to issuance, a draft of this permit has undergone a public notice and comment period.
- c. This permit supersedes all operating permits issued for this location.
2. Emissions of volatile organic material (VOM) and operation of the 2 flexographic presses and plate making operation shall not exceed the following limits:

<u>Equipment</u>	<u>Material</u>	<u>Usage</u>		<u>VOM Content</u>	<u>VOM Emissions</u>	
		<u>(Per Mo)</u>	<u>(Per/Yr)</u>		<u>(Lb/Mo)</u>	<u>(T/Yr)</u>
Plate Making	Washout	75 gal	750 gal	6.9 lb/gal	520	2.6
2 Flexographic Presses	Water-Based Ink	30,000 lb	300,000 lb	6% by wt.	1,800	9.0
	Solvent Ink	3,000 lb	30,000 lb	25% by wt.	760	3.8
	Clean-Up	2,250 lb	22,500 lb	100% by wt.	1,140	5.7
Totals:					4,220	21.10

These limits define the potential emissions of VOM and are based on maximum material usage, maximum VOM content, and 50 percent retention of the clean up solutions in rags that are sent off site. Compliance with annual limits shall be determined from a running total of 12 months of data.

3. The emissions of Hazardous Air Pollutants (HAP) as listed in Section 112(b) of the Clean Air Act shall be less than 10 tons/year of any single HAP and 25 tons/year of any combination of such HAPs. As a result of this condition, this permit is issued based on the emissions of all HAPs from this source not triggering the requirements to obtain a Clean Air Act Permit Program Permit (CAAPP), and Section 112(G) of the Clean Air Act.
- 4a. This permit is issued based on negligible emissions of particulate matter (PM) from the two laminators/coaters. For this purpose, emissions shall not exceed nominal emission rates of 0.1 lb/hour and 0.44 ton/year per unit.
- b. This permit is issued based on negligible emissions of ozone from the two Corona arc treaters. For this purpose, emissions shall not exceed nominal emission rates of 0.1 lb/hour and 0.44 ton/year per unit.
5. This permit is issued based on the two laminators/coater using materials that do not contain any volatile organic material.
6. The Permittee must comply with the following emission limitations and control requirements for all flexographic printing presses, pursuant to 35 Ill. Adm. Code 218.401:
 - a. The VOM content of the coating and ink (minus water and any compounds which are specifically exempted from the definition of VOM) shall not exceed 40.0 percent, by volume.
7. The Permittee shall collect and record the following information for each flexographic printing line, pursuant to 35 Ill. Adm. Code 218.404:
 - a. Daily records of the name and identification of each ink, coating, and any other clean-up solvent as applied on each printing line; and
 - b. Daily records of the VOM content of each ink, coating, and any other cleanup solvent as applied on each printing line.
8. If changing its method of demonstrating compliance with the applicable VOM content limitations in 35 Ill. Adm. Code 218.407, or changing the method of demonstrating compliance with the VOM content limitations for fountain solutions pursuant to 35 Ill. Adm. Code 218.407. Certify compliance for such new method(s) in accordance with 35 Ill. Adm. Code 218.411(c) (1) within 30 days after making such change, and perform all tests and calculations necessary to demonstrate that such printing line(s) will be in compliance with the applicable requirements of 35 Ill. Adm. Code 218.407.
9. The Permittee shall maintain monthly records of the following items:
 - a. Amount of each ink, coating, wash-up solvent, and clean-up solvent used in the laminator/coater, plate making operation, and printing lines (lb or gal/mo and gal or ton/yr);
 - b. VOM content of each ink, coating, wash-up solvent, and clean-up solvent used in the laminator/coater, plate making operation, and printing lines (percent weight of VOM or lb VOM/gal); and
 - c. VOM emissions from the plate making operation and printing lines (lb/mo and ton/yr).

10. All records and logs required by this permit shall be retained at a readily accessible location at the source for at least three years from the date of entry and shall be made available for inspection and copying by the Illinois EPA or USEPA upon request. Any records retained in an electronic format (e.g., computer) shall be capable of being retrieved and printed on paper during normal source office hours so as to be able to respond to an Illinois EPA or USEPA request for records during the course of a source inspection.
11. If there is an exceedance of the requirements of this permit as determined by the records required by this permit, the Permittee shall submit a report to the Illinois EPA's Compliance Section in Springfield, Illinois within 30 days after the exceedance. The report shall include the emissions released in accordance with the recordkeeping requirements, a copy of the relevant records, and a description of the exceedance or violation and efforts to reduce emissions and future occurrences.
12. Two (2) copies of required reports and notifications concerning equipment operation or repairs, performance testing or a continuous monitoring system shall be sent to:

Illinois Environmental Protection Agency
Division of Air Pollution Control
Compliance Section (#40)
P.O. Box 19276
Springfield, Illinois 62794-9276

and one (1) copy shall be sent to the Illinois EPA's regional office at the following address unless otherwise indicated:

Illinois Environmental Protection Agency
Division of Air Pollution Control
9511 West Harrison
Des Plaines, Illinois 60016

13. The Permittee shall submit the following additional information with the Annual Emissions Report, due May 1st of each year:
 - a. VOM content (percent by weight) of each ink, coating, wash-up solvent, and cleanup solvent;
 - b. Each month's monthly and annual material usages for the preceding calendar year (i.e., preceding 12 months);
 - c. Each month's monthly and annual VOM emissions for the preceding calendar year (i.e., preceding 12 months); and
 - d. Dates that the plant exceeded the annual usage or VOM limitations, if applicable.

If there have been no exceedances during the prior calendar year, the Annual Emission Report shall include a statement to that effect.

It should be noted that the fuel combustion emissions from the 2 flexographic presses, furnace, 2 laminator coater ovens, and air make-up heater are exempt from state permit requirements, pursuant to 35 Ill. Adm. Code 201.146(fff) and (d), respectively.

It should be noted that the extruders are exempt from state permit requirements, pursuant to 35 Ill. Adm. Code 201.146(cc).

Page 4

It should be noted that this permit has been revised to incorporate Construction Permit No. 02070078 to include a new flexographic press to replace two existing.

If you have any questions on this, please call Tara T. Nguyen-Ede at 217/782-2113.

Attachment A - Emission Summary

This attachment provides a summary of the maximum emissions from the commercial printing source operating in compliance with the requirements of this federally enforceable permit. In preparing this summary, the Illinois EPA used the annual operating scenario which results in maximum emissions from such a plant. The resulting maximum emissions are well below the levels, e.g., 25 tons/year for volatile organic material (VOM) and 10 tons/year for any single HAP and 25 tons/year for combination of HAPs at which this source would be considered a major source for purposes of the Clean Air Act Permit Program. Actual emissions from this source will be less than predicted in this summary to the extent that less material is handled and control measures are more effective than required in this permit.

1. Emissions of volatile organic material (VOM) and operation of the 2 flexographic presses and plate making operation shall not exceed the following limits:

<u>Equipment</u>	<u>Material</u>	<u>Usage</u>		<u>VOM Content</u>	<u>VOM Emissions</u>	
		<u>(Per Mo)</u>	<u>(Per/Yr)</u>		<u>(Lb/Mo)</u>	<u>(T/Yr)</u>
Plate Making	Washout	75 gal	750 gal	6.9 lb/gal	520	2.6
2 Flexographic Presses	Water-Based Ink	30,000 lb	300,000 lb	6% by wt.	1,800	9.0
	Solvent Ink	3,000 lb	30,000 lb	25% by wt.	760	3.8
	Clean-Up	2,250 lb	22,500 lb	100% by wt.	<u>1,140</u>	<u>5.7</u>
Totals:					4,220	21.10

These limits define the potential emissions of VOM and are based on maximum material usage, maximum VOM content, and 50 percent retention of the clean up solutions in rags that are sent off site. Compliance with annual limits shall be determined from a running total of 12 months of data.

2. The emissions of Hazardous Air Pollutants (HAP) as listed in Section 112(b) of the Clean Air Act shall be less than 10 tons/year of any single HAP and 25 tons/year of any combination of such HAPs. As a result of this condition, this permit is issued based on the emissions of all HAPs from this source not triggering the requirements to obtain a Clean Air Act Permit Program Permit (CAAPP), and Section 112(G) of the Clean Air Act.
3. This permit is issued based on negligible emissions of particulate matter (PM) from the two laminators/coaters. For this purpose, emissions shall not exceed nominal emission rates of 0.1 lb/hour and 0.44 ton/year per unit.
4. This permit is issued based on negligible emissions of ozone from the two Corona arc treaters. For this purpose, emissions shall not exceed nominal emission rates of 0.1 lb/hour and 0.44 ton/year per unit.
