

Public Notice
Proposed Issuance of a Construction Permit to
Fleischmann's Vinegar, Chicago

Fleischmann's Vinegar has applied to the Illinois Environmental Protection Agency (Illinois EPA) to construct five new acetators and modify some existing acetators at its facility located at 4801 South Oakley Avenue in Chicago. For purposes of nonattainment New Source Review this project is considered related to the previous acetator project. The projects together including contemporaneous increases and decreases in emissions would not exceed the major threshold so that the project would not be a major modification as defined in 35 Illinois Administrative Code 203. The Illinois EPA is accepting comments prior to making a final decision on this project.

Persons wanting more information may obtain copies of the draft permit, and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, State Construction Permits, New). These documents and the application can also be obtained from the Illinois EPA's offices at 9511 West Harrison in Des Plaines, 847/294-4000 (please call ahead to assure that someone will be available to assist you) and 1340 North Ninth St., Springfield, 217/782-7027. Copies of the documents will be made available upon request.

Comments are requested on the proposed issuance of the permit. Comments must be postmarked by midnight April 6, 2001. If sufficient interest is expressed in the permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.
