

Illinois Environmental Protection Agency

Public Notice  
of the Proposed Revision of the Federally Enforceable State Operating  
Permit for  
The Arnold Engineering Company in Marengo

The Arnold Engineering Company has requested that the Illinois Environmental Protection Agency revise the federally enforceable state operating permit (FESOP) for the air emissions from its metallic alloys manufacturing plant located at 300 North West Street in Marengo. The permit is being revised to limit emissions of volatile organic material from the facility during the ozone season so that the facility is not subject to the requirements of the Emissions Reduction Market System (ERMS), 35 Ill. Adm. Code 205.205. The Illinois EPA has made a preliminary determination that the application would comply with the environmental regulations and has prepared a draft permit for public review.

The Illinois EPA is accepting comments on the draft permit. Comments must be postmarked by midnight October 11, 2008. If sufficient interest is expressed in the permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit, and project summary at [www.epa.gov/region5/air/permits/ilonline.htm](http://www.epa.gov/region5/air/permits/ilonline.htm) (please look under All Permit Records, FESOP, Revision). These documents and the application may also be obtained from the Illinois EPA's offices at 9511 West Harrison in Des Plaines, 847/294-4000 and 1340 North Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The 1990 amendments to the Clean Air Act require potentially major sources of air emissions to obtain federally enforceable operating permits. A FESOP allows a source that is potentially major to take operational limits in the permit so that it is a non-major source. The permit will contain federally enforceable limitations that restrict the facility's emissions to non-major levels. The permit will be enforceable by the USEPA, as well as the Illinois EPA.
