

Illinois Environmental Protection Agency

Public Notice

Proposed Renewal of the Clean Air Act Permit Program Permit for  
NRG Rockford Energy Center in Rockford

NRG Rockford Energy Center has requested that the Illinois Environmental Protection Agency (Illinois EPA) renew the Clean Air Act Permit Program (CAAPP) permit regulating air emissions from its electric generation facility located at 136 Harrison Avenue in Rockford. Based on its review of the application, the Illinois EPA has made a preliminary determination that the application meets the standards for issuance and has prepared a draft permit for public review.

The Illinois EPA is also proposing to renew the Acid Rain permit for the plant, pursuant to Section 39.5(17)(b) of Illinois' Environmental Protection Act. The Acid Rain Permit would require NRG Rockford Energy Center to hold SO<sub>2</sub> allowances for the actual SO<sub>2</sub> emissions from the turbines.

The Illinois EPA is accepting comments on the draft permit. Comments must be postmarked by midnight November 15, 2008. If sufficient interest is expressed in the draft permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit and project summary at [www.epa.gov/region5/air/permits/ilonline.htm](http://www.epa.gov/region5/air/permits/ilonline.htm) (please look under All Permit Records, Title V, Renewal). These documents and the application are available at the Illinois EPA's offices at 4302 N. Main in Rockford, 815/987-7750 and 1340 North Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The CAAPP is Illinois' operating permit program for major sources of emissions, as required by Title V of the Clean Air Act (Act). The conditions of CAAPP permits are enforceable by the public, as well as by the USEPA and Illinois EPA. In addition to implementing Title V of the Act, CAAPP permits may contain "Title I Conditions," i.e., conditions established under the permit programs for new and modified emission units, pursuant to Title I of the Act. This permit contains T1 conditions in sections 7.1.5, 7.1.6, 7.2.5, and 7.2.6 that were established in previously issued permits. The permit contains no T1 conditions that are revised or newly established by this application.
