

Illinois Environmental Protection Agency

Notice of Public Comment Period for the  
Proposed Issuance of a Construction Permit to  
Sun Chemical Corporation in Northlake

Sun Chemical Corporation has applied to the Illinois EPA for a construction permit for an expansion project at its ink manufacturing plant located at 135 West Lake Street in Northlake. The project would include installation of new equipment to increase the capabilities and capacity of the plant. Because much of the existing equipment at the plant would be permanently shut down, the project would not be accompanied by a significant increase in VOM emissions. The project would not be a major new source or modification for purposes of the federal rules for Prevention of Significant Deterioration (PSD), 40 CFR 52.21 or the state rules Major Stationary Sources Construction and Modification, 35 Ill. Adm. Code Part 203.

Based on its review of the application, the Illinois EPA has made a preliminary determination that this project will comply with the applicable environmental regulations and has prepared a draft permit for public review.

The Illinois EPA is accepting comments prior to making a final decision on the application for this project. **Comments must be postmarked by midnight October 2, 2010.** If sufficient interest is expressed in this matter, a hearing may be held. Comments, questions and requests for information, should be directed to Brad Frost, Bureau of Air, Illinois EPA, P. O. Box 19506, Springfield, IL 62794-9506, phone 217/782-2113, TDD 217/782-9143.

Persons wanting more information may view the draft permit and project summary at <http://www.epa.gov/reg5oair/permits/ilonline.html>. The repositories for these documents and the application are located at the Illinois EPA's offices at 9511 West Harrison in Des Plaines, 847/294-4000 and 1340 N. Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.
