

Public Notice
Proposed Issuance of a Construction Permit to
Archer Daniels Midland Company - Peoria

Archer Daniels Midland Company - Peoria has applied for a permit from the Illinois Environmental Protection Agency (Illinois EPA) to install conveying equipment at its facility located at the foot of Edmund Street in Peoria. The conveying equipment would move wet feed to an open storage area and would enable increased production of wet feed at the facility. The change would increase emissions from other ethanol production operations at the facility due to the increased throughput of wet feed. In conjunction with this project, ADM will reduce emissions of volatile organic material from the Sharples centrifuges, which reduce water content of the feed prior to drying. The project will not be a major modification as defined by the federal Prevention of Significant Deterioration (PSD) rules, 40 CFR 52.21. **The Illinois EPA is accepting comments prior to making a final decision on this project.**

Persons wanting more information may obtain copies of the draft permit and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, State Construction Permits, New). These documents and the application can also be obtained from the Illinois EPA's offices at 5415 N. University Street in Peoria, 309/693-5461 and 1340 North Ninth St., Springfield, 217/782-7027 (for either location please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The Illinois EPA is accepting comments prior to making a final decision on this project. **Comments must be postmarked by midnight August 28, 2005.** If sufficient interest is expressed in the permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.
