

To Whom it May Concern:

The Illinois EPA has received requests to extend the comment period for the draft revised proposed Title V permits posted on the U.S. EPA website on July 19, 2005. The comment period ends on August 1, 2005. Considering the fact that the public has previously been afforded public comment on these permits, and consistent with the Environmental Protection Act, the Illinois EPA believes the 10 day comment period is sufficient. Therefore, the Agency is hereby denying the request. Any comments must be postmarked by August 1, 2005.
