

Illinois Environmental Protection Agency

Public Notice
Proposed Revision of a Construction Permit for
Marathon Petroleum Company LLC in Robinson

Marathon Petroleum Company LLC has applied to the Illinois Environmental Protection Agency (Illinois EPA) to revise the construct permit for its gasoline desulfurization unit (GDU) project at the refinery located on Marathon Avenue in Robinson. Marathon has requested that the permit be revised to increase the permitted volatile organic material (VOM) emissions from the new components associated with the GDU project. Because the VOM emissions for this project would now exceed 40 tons/year, a netting analysis was required. Including contemporaneous changes in emissions the project would not be a major modification as defined by the federal Prevention of Significant Deterioration (PSD) rules, 40 CFR 52.21.

Based on its review of the application, the Illinois EPA has made a preliminary determination that this project will comply with the applicable environmental regulations and has prepared a draft permit for public review.

The Illinois EPA is accepting comments prior to making a final decision on the application for this project. Comments must be postmarked by midnight October 13, 2007. If sufficient interest is expressed in this matter, a hearing may be held. Comments, questions and requests for information, should be directed to Brad Frost, Bureau of Air, Illinois EPA, P. O. Box 19506, Springfield, IL 62794-9506, phone 217/782-2113, TDD 217/782-9143.

Persons wanting more information may view the draft permit and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, State Construction Permits, Revision). These documents and the application may also be viewed at the Illinois EPA's offices at 2125 South First Street in Champaign, 217/278-5800 and 1340 N. Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.
