FEDERALLY ENFORCEABLE STATE OPERATING PERMIT - RENEWAL

PERMITTEE

Cedar Siding and Lumber
Attn: Jeb Harper
147 East 2nd Avenue
Rochelle, Illinois 61068

Application No.: 97120087
Applicant's Designation: FLOW COATERS
Subject: Flow Coaters
Date Issued:
Location: 147 East 2nd Avenue, Rochelle

I.D. No.: 141050ABK
Date Received: October 28, 2004
Expiration Date:

This permit is hereby granted to the above-designated Permittee to OPERATE emission unit(s) and/or air pollution control equipment consisting of four flow coaters with 2 dryers pursuant to the above-referenced application. This Permit is subject to standard conditions attached hereto and the following special condition(s):

- 1a. This federally enforceable state operating permit is issued to limit the emissions of air pollutants from the source to less than major source thresholds (i.e., Volatile Organic Material (VOM) less than 100 tons/year, Hazardous Air Pollutants (HAP) less than 10 tons/year individual and 25 tons/year combined). As a result the source is excluded from the requirement to obtain a Clean Air Act Permit Program (CAAPP) permit. The maximum emissions of this source, as limited by the conditions of this permit, are described in Attachment A.
- b. Prior to issuance, a draft of this permit has undergone a public notice and comment period.
- c. This permit supersedes all operating permits issued for this location.
2. The coatings used shall be formulated to non-photochemically reactive. This is to meet the exemption from the use of organic material requirement in 35 Ill. Adm. Code 215.302. Photochemically reactive material is defined in 35 Ill. Adm. Code 211.4690.
3. Emissions and operation of the flow coaters shall not exceed the following limits:

| VOM* Usage | | VOM* Emissions | |
|---------------------|--------------------|---------------------|--------------------|
| <u>(Tons/Month)</u> | <u>(Tons/Year)</u> | <u>(Tons/Month)</u> | <u>(Tons/Year)</u> |
| 7.76** | 93.1 | 7.76** | 93.1 |

* Volatile Organic Material (VOM)

** Average of the preceding twelve months of data.

These limits are based on the maximum VOM usage. Compliance shall be determined from the actual coating usage and VOM content. Compliance with the monthly limit shall be determined by the average of the preceding twelve months of data. Compliance with annual limits shall be determined from a running total of 12 months of data.

4. This permit is issued based on negligible emissions of volatile organic material from fuel combustion. For this purpose, emissions shall not exceed nominal emission rates of 0.1 lb/hour and 0.44 tons/year.
5. The emissions of Hazardous Air Pollutants (HAPs) as listed in Section 112(b) of the Clean Air Act shall not equal or exceed 10 tons per year of any single HAP or 25 tons per year of any combination of such HAPs, or such lesser quantity as USEPA may establish in rule which would require the Permittee to obtain a CAAPP permit from the Illinois EPA. As a result of this condition, this permit is issued based on the emissions of any HAP from this source not triggering the requirement to obtain a CAAPP permit from the Illinois EPA.
6. The Permittee shall maintain monthly records of the following items:
 - a. Each coating and solvent usage (gallon/month) (Solvents for cleanup, dilution, etc. shall be included).
 - b. VOM content of each coating and solvent (lb/gallon).
 - c. Individual HAP content of each coating and solvent (lb/gallon).
 - d. VOM emissions (tons/month and tons/year).
 - e. Individual and combined HAP emissions (lb/month and tons/year).
7. All records and logs required by this permit shall be retained at a readily accessible location at the source for at least three years from the date of entry and shall be made available for inspection and copying by the Illinois EPA or USEPA upon request. Any records retained in an electronic format (e.g., computer) shall be capable of being retrieved and printed on paper during normal source office hours so as to be able to respond to an Illinois EPA or USEPA request for records during the course of a source inspection.
8. If there is an exceedance of the requirements of this permit as determined by the records required by this permit, the Permittee shall submit a report to the Illinois EPA's Compliance Section in Springfield, Illinois within 30 days after the exceedance. The report shall include the emissions released in accordance with the recordkeeping requirements, a copy of the relevant records, and a description of the exceedance or violation and efforts to reduce emissions and future occurrences.

9. Two (2) copies of required reports and notifications concerning equipment operation or repairs, performance testing or a continuous monitoring system shall be sent to:

Illinois Environmental Protection Agency
Division of Air Pollution Control
Compliance Section (#40)
P.O. Box 19276
Springfield, Illinois 62794-9276

and one (1) copy shall be sent to the Illinois EPA's regional office at the following address unless otherwise indicated:

Illinois Environmental Protection Agency
Division of Air Pollution Control
5415 North University
Peoria, Illinois 61614

If you have any questions on this permit, please call John Blazis at 217/782-2113.

Attachment A - Emission Summary

This attachment provides a summary of the maximum emissions from wood coating plant operating in compliance with the requirements of this federally enforceable permit. In preparing this summary, the Illinois EPA used the annual operating scenario which results in maximum emissions from such a plant. The resulting maximum emissions are below the levels, (e.g., 100 tons per year of VOM, 10 tons per year individual HAP and 25 tons per year combined HAP) at which this source would be considered a major source for purposes of the Clean Air Act Permit Program. Actual emissions from this source will be less than predicted in this summary to the extent that less material is handled, and control measures are more effective than required in this permit.

1. Flow Coaters:

VOM Emissions: 93.1 Tons/Year
Individual HAP: < 10 Tons/Year
Combined HAP: < 25 Tons/Year

2. Fuel Combustion VOM Emissions: 0.44 Tons/Year
