

Illinois Environmental Protection Agency

Public Notice  
of the Proposed Revision of the Federally Enforceable State Operating  
Permit for  
Plastag Holdings, L.L.C. in Elk Grove Village

Plastag Holdings, L.L.C. has requested that the Illinois Environmental Protection Agency revise the federally enforceable state operating permit (FESOP) regulating the air emissions from its printing operations located at 1800 Greenleaf in Elk Grove Village. The operating permit is being revised to include the addition of thirteen printing presses for which the company was issued a construction permit in 2005. The operating permit is also being revised to establish a 15-ton season limit for volatile organic material emissions from Plastag to exempt the facility from the Emission Reduction Market System. The Illinois EPA has made a preliminary determination to issue a permit to the facility and has prepared a draft permit for public review.

The Illinois EPA is accepting comments on the draft permit. Comments must be postmarked by midnight April 29, 2006. If sufficient interest is expressed in a permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit, and project summary at [www.epa.gov/region5/air/permits/ilonline.htm](http://www.epa.gov/region5/air/permits/ilonline.htm) (please look under All Permit Records, FESOP, Revision). These documents and the application may also be obtained from the Illinois EPA's offices at 9511 West Harrison in Des Plaines, 847/294-4000 and 1340 North Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The 1990 amendments to the Clean Air Act require potentially major sources of air emissions to obtain federally enforceable operating permits. A FESOP permit allows a source that is potentially major to take operational limits in the permit so that it is a non-major source. The permit will contain federally enforceable limitations that restrict the facility's emissions to non-major levels. The permit will be enforceable by the USEPA, as well as the Illinois EPA.
