

Illinois Environmental Protection Agency

Public Notice  
of the Proposed Revision of the Federally Enforceable State Operating  
Permit for  
Diageo North America, Inc. in Plainfield

Diageo North America, Inc. has requested that the Illinois Environmental Protection Agency revise the federally enforceable state operating permit (FESOP) for the air emissions from its distilled spirits, adult beverage and ready-to-drink plant located at 24440 West 143rd Street in Plainfield. The operating permit is being revised to incorporate the equipment permitted in construction permit 09040055, a new filler line for the ready-to-drink and distilled spirits processing areas. The permit is also being revised to establish federally enforceable Emission Reduction Market System (ERMS) provisions, including baseline emissions, allotment for each seasonal allotment period, emissions calculation methodologies, and provisions addressing all other applicable requirements of 35 Ill. Adm. Code Part 205.

The Illinois EPA has made a preliminary determination that the application would comply with the environmental regulations and has prepared a draft permit for public review.

The Illinois EPA is accepting comments on the draft permit. Comments must be postmarked by midnight October 10, 2009. If sufficient interest is expressed in the permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit, and project summary at [http://yosemite.epa.gov/r5/in\\_permt.nsf/25f48bd650fc4dd5862575b400694a13!OpenView](http://yosemite.epa.gov/r5/in_permt.nsf/25f48bd650fc4dd5862575b400694a13!OpenView) (please look under FESOP, Revision). These documents and the application may also be obtained from the Illinois EPA's offices at 9511 West Harrison in Des Plaines, 847/294-4000 and 1340 North Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The 1990 amendments to the Clean Air Act require potentially major sources of air emissions to obtain federally enforceable operating permits. A FESOP allows a source that is potentially major to take operational limits in the permit so that it is a non-major source. The permit will contain federally enforceable limitations that restrict the facility's emissions to non-major levels. The permit will be enforceable by the USEPA, as well as the Illinois EPA.
