

Illinois Environmental Protection Agency

Public Notice  
of the Proposed Renewal of the Federally Enforceable State Operating  
Permit for  
Weyerhaeuser Company in Belleville

Weyerhaeuser Company has requested that the Illinois Environmental Protection Agency renew the federally enforceable state operating permit (FESOP) regulating the air emissions from its box manufacturing plant located at 3001 Otto Street in Belleville. The permit is also being revised to incorporate the operation of a three color Hamada 1000/2500 flexo folder gluer and the removal of three existing machines. The Illinois EPA has reviewed the application and made a preliminary determination to issue a permit for the project. A draft permit has been prepared for public review and comment.

The Illinois EPA is accepting written comments on the draft permit. Comments must be postmarked by midnight August 12, 2006. If sufficient interest is expressed in the draft permit, a hearing may be held. Requests for information, comments, and questions should be directed to Brad Frost, Division of Air Pollution Control, Illinois Environmental Protection Agency, PO. Box 19506, Springfield, Illinois 62794-9506, phone 217/782-2113, TDD phone number 217/782-9143.

Persons wanting more information may obtain copies of the draft permit, and project summary at [www.epa.gov/region5/air/permits/ilonline.htm](http://www.epa.gov/region5/air/permits/ilonline.htm) (please look under All Permit Records, FESOP, Renewal). These documents and the application may also be obtained from the Illinois EPA's offices at 2009 Mall Street, Collinsville, 618/346-5120 or 1340 North Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.

The 1990 amendments to the Clean Air Act require potentially major sources of air emissions to obtain federally enforceable operating permits. A FESOP permit allows a source that is potentially major to take operational limits in the permit so that it is a non-major source. The permit will contain federally enforceable limitations that restrict the facility's emissions to non-major levels. The permit will be enforceable by the USEPA, as well as the Illinois EPA.
