

Illinois Environmental Protection Agency

Proposed Revision of the Construction Permit for
Afton Chemical Corporation in Sauget

Afton Chemical Corporation has applied to the Illinois EPA to revise the construction permit for its new flare control system at its facility located at 501 Monsanto Avenue in Sauget. Construction permit #06020100 is being revised to include operational and emission limits that restrict the source to operation as a minor source of hazardous air pollutants (HAP), so that the source will not be subject to the MON rule, 40 CFR 63, Subpart FFFF. The project is not major under the rules for Prevention of Significant Deterioration (PSD), 40 CFR 52.21, or Major Stationary Sources Construction and Modification (MSSCAM), 35 IAC Part 203.

Based on its review of the application, the Illinois EPA has made a preliminary determination that the application for this project complies with applicable rules and has prepared a draft permit for public review.

The Illinois EPA is accepting comments prior to making a final decision on the application. **Comments must be postmarked by midnight April 19, 2008.** If sufficient interest is expressed in this matter, a hearing may be held. Comments, questions and requests for information, should be directed to Brad Frost, Bureau of Air, Illinois EPA, Box 19506, Springfield, IL 62794-9506, phone 217/782-2113, TDD 217/782-9143.

Persons wanting more information may view the draft permit and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, State Construction Permits, Revision). These documents and the application may also be viewed at the Illinois EPA's offices at 2009 Mall Street in Collinsville, 618/346-5120 and 1340 N. Ninth St., Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of the documents will be made available upon request.
