REPLY TO THE ATTENTION OF:

Mary Ann Dolehanty
Permit Section Supervisor
Department of Environmental Quality
Air Quality Division
P.O. Box 30260
Lansing, Michigan 48909-7760

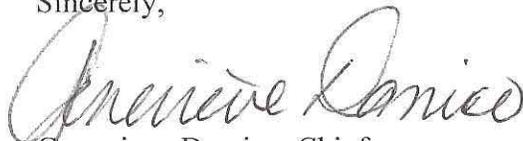

Dear Ms. Dolehanty:

Thank you for the opportunity to provide the Michigan Department of Environmental Quality comments on the draft construction permit for the Chrysler Group LLC- Mack Avenue Engine Plant (permit number 261-99B). The U.S. Environmental Protection Agency's comment is as follows:

On page 7 of the draft permit, there are emission limits for Volatile Organic Compounds (VOCs), benzene, 1,3-butadiene, and formaldehyde. The emissions of these pollutants are based on the emission factor for VOCs and a correction factor. It is not readily apparent in either the draft permit or the fact sheet how this calculation is used to derive the ton per year emission rate. To ensure practical enforceability of these permit conditions, EPA recommends that the equation used to determine the ton per year limit from the emission rate be provided for in the permit or fact sheet.

We would like to thank you again for working with us in making sure that these issues were resolved in a timely manner. If you have any further questions, please feel free to contact Constantine Blathras, of my staff, at (312) 886-0671.

Sincerely,

Genevieve Damico, Chief
Air Permits Section
