

**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY**

REGION 5

77 WEST JACKSON BOULEVARD

CHICAGO, IL 60604-3590

JUN 17 2011

REPLY TO THE ATTENTION OF:

Robert J. Long  
President  
Summit Petroleum Corporation  
P.O. Box 365  
Mount Pleasant, Michigan 48804-0365

Dear Mr. Long:

The U.S. Environmental Protection Agency has completed its review of your application for a Clean Air Act (CAA) federal permit to operate for Summit Petroleum Corporation, in Rosebush, Michigan. EPA received the application on April 18, 2011.

This letter documents EPA's completeness determination under the federal operating permit regulations and notifies you of your continuing obligation under 40 C.F.R. § 71.5(b) to correct any misinformation and supplement the information provided. Pursuant to 40 C.F.R. § 71.5, we have determined that the information submitted in the application is not complete. Since your permit application is incomplete, you are not covered by an application shield pursuant to 40 C.F.R. §71.7(b).

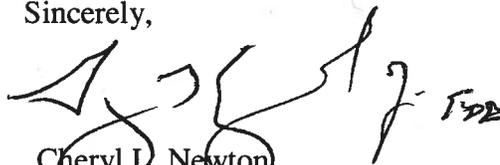

Please be aware that the Michigan state implementation plan requirements do not apply to sources located within the exterior boundaries of an Indian reservation, nor did Michigan have the authority to issue permits to sources within the Isabella Reservation pursuant to its delegated authority under the Prevention of Significant Deterioration (PSD) program. Therefore, terms of the PSD permit (permit number 631-82I), originally issued in 1982, are inapplicable. EPA is prepared to work with Summit to develop appropriate applicable requirements through a federal implementation plan or federal PSD permit.

We note that your application references Subpart LLL, but your application does not make clear whether you believe these limits apply to your facility. You must clarify and provide additional information if you intend your application to incorporate Subpart LLL.

Please remember this determination does not affect your obligation to comply with all applicable CAA requirements regardless of part 71 permit issuance. Furthermore, future changes at the facility, whether considered major or minor for construction permitting purposes, may necessitate updating your part 71 operating permit application. Please provide EPA a response to our request for additional information within 30 days of receipt of this letter.

If you have any questions, please contact Constantine Blathras, of my staff, at (312) 886-0671.  
We look forward to working with you to ensure that your facility is properly permitted.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cheryl L. Newton', with a stylized flourish at the end.

Cheryl L. Newton

Director

Air and Radiation Division
