

# MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

## AIR QUALITY DIVISION

### PART 1. GENERAL PROVISIONS

#### **R 336.1101 Definitions; A.**

Rule 101. As used in these rules:

(c) "Actual emissions" means the average rate, in tons per year, at which the process or process equipment actually emitted the air contaminant during the preceding 2-year period and which was representative of the normal operation of the process or process equipment. A different time period may be used if the time period can be demonstrated to be more representative of normal operation. Actual emissions shall be calculated using the process's or process equipment's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period. The commission may presume that the actual emissions for a process or process equipment shall equal the allowable emissions for such process or process equipment if the allowable emissions are identified in the demonstration for an approved state implementation plan. For any process or process equipment that has not begun normal operations, actual emissions shall equal the allowable emissions. The term "actual emissions" is not applicable in parts 6 and 7 of these rules.

(g) "Air-dried coating" means a coating that is dried by the use of air or forced warm air at temperatures up to 90 degrees Celsius (194 degrees Fahrenheit).

(i) "Air quality standard" means the concentration and duration of an air contaminant specified by the commission or by the national ambient air quality standards as contained in the provisions of 40 C.F.R. part 50 (1990), whichever is more restrictive, at the maximum acceptable concentration and duration of that contaminant in the ambient air.

(j) "Allowable emissions" means the emission rate calculated using the maximum rated capacity of the process or process equipment, unless there are legally enforceable limits that restrict the operating rate or the hours of operation, or both, and the most stringent of the following:

(i) Any applicable standards pursuant to the clean air act, as amended, 42 U.S.C. §7401 et seq.

(ii) Any applicable emission limit specified in these rules, including a limit that has a future compliance date.

(iii) Any applicable emission rate specified as a legally enforceable permit condition or voluntary agreement, performance contract, stipulation, or order of the commission, including a rate that has a future compliance date.

(k) "Alternate opacity" means that standard for density of emission which is greater than the standard specified in R.336-1301(1) and which is established by the commission for a specific process or process equipment in accordance with the provisions of R 336.1301(4).
