NOTICE OF INTENT TO ISSUE A DRAFT CLEAN AIR ACT PART 71 PERMIT TO OPERATE FOR CLOQUET COMPRESSOR STATION NO. 5

The U. S. Environmental Protection Agency requests public comment on the draft Air Pollution Control Title V Permit to Operate for Cloquet Compressor Station No. 5 (Permit No. V-FDL-2713700066-2016-03) located at 3741 Brandon Road, Cloquet, Minnesota. The public comment period for the draft permit ends January 9, 2017.

This action would permit Great Lakes Gas Transmission Limited Partnership to operate air emission units and conduct other air pollutant emitting activities in accordance with the permit conditions listed in the permit. Air emission units at the facility include three stationary natural gas-fired turbines and one stationary natural gas-fired electrical generator.

This second public comment period is being held because the draft permit and statement of basis have been significantly revised, based upon new information submitted by the permit applicant indicating that the electrical generator does not participate in peak loading operations and is only utilized for compressor station operations during periods of electrical power disruption. Accordingly, the draft permit and statement of basis have been revised to reflect the status of the electrical generator as an emergency engine under 40 C.F.R. Part 63, Subpart ZZZZ.

The draft permit and permit record, including the application and all supporting materials submitted by the source, are available for review online at <https://www.regulations.gov> under Docket ID No. EPA-R05-OAR-2016-0703 and at <https://www.epa.gov/caa-permitting/caa-permitting-epas-great-lakes-region>. Members of the public may also review the draft permit and permit record at the EPA Region 5 office in Chicago located at 77 West Jackson Boulevard, 18th floor, Chicago, Illinois 60604, by contacting Mr. Paymon Danesh at (312) 886-6219 or [danesh.paymon@epa.gov](mailto:danesh.paymon@epa.gov). All documents will be available for review at the EPA Region 5 office in Chicago Monday through Friday from 8:15 AM until 4:45 PM (excluding federal holidays).

Written comments may be sent to Edward Nam, Acting Director, Air and Radiation Division (A-18J), at the above EPA Region 5 office address, or online at <https://www.regulations.gov> under Docket ID No. EPA-R05-OAR-2016-0703 by January 9, 2017. All written comments should include the reason for interest in the draft permit, requested actions for EPA to take, and the justification for such actions. All comments should include sufficient specificity and regulatory references to allow EPA to investigate the merits of the position.

If you do not want to comment at this time, but would like to receive notice of future action related to this permit application, contact EPA Region 5 at the address listed above.

Members of the public may also request a public hearing. A request for a public hearing must be made in writing and must state the nature of the issues proposed to be raised at

the hearing. Written requests for a public hearing should be sent to the EPA Region 5 address listed above.

All relevant comments received prior to the end of the public comment period will be considered in arriving at a final decision on the permit. All comments will be included in the public docket without change and may be made available to the public, including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through e-mail. If you send e-mail directly to EPA, your e-mail address will be captured automatically and included as part of the public comment. Please note that an e-mail or postal address must be provided with your comments if you wish to receive direct notification of EPA's final decision regarding the permit and its responses to comments submitted during the public comment period. The final permit is a public record that can be obtained upon request. A statement of reasons for changes made to the draft permit and responses to comments received will be sent to all persons who commented on the draft permit. If you believe any condition of the draft permit is inappropriate or that our initial decision to deny an application, terminate a permit, or prepare a draft permit is inappropriate, you must raise all reasonably ascertainable issues and submit all reasonably ascertainable arguments supporting your position by the end of the comment period.
