Re: Administrative Order, Docket Number: SDWA-06-2013-1291
PWS ID Number: TX0850012

Dear Mr. Delton Osborn:

Enclosed is an Administrative Order (Order) issued to you for violation of the Safe Drinking Water Act (Act), 42 U.S.C. § 300f, et seq., and its implementing regulations, 40 C.F.R. Part 141. The Environmental Protection Agency (EPA) finds that you own or operate the public water system (PWS) identified in the Order and are therefore subject to these regulations. The Order also requires certain actions and information demands.

This Order requires immediate compliance with the maximum contaminant level (MCL) for uranium as set forth in Section 1412 of the Act, 42 U.S.C. § 300g-1. If immediate compliance is not possible, you must submit a treatment alternative with a construction and/or repair schedule that will achieve compliance no later than eighteen (18) months from the effective date of the enclosed Order. Compliance with the MCL is based on a running annual average. As described in the enclosed Order, you are required to deliver drinking water that meets the national standards for uranium and to conduct quarterly monitoring to ensure compliance with the MCL. Please be aware that failure to comply with this Order may subject you to additional enforcement action by EPA, including the initiation of legal proceedings to seek monetary penalties.

EPA also wants you to be aware of a new process in Texas that was created to help facilities secure technical assistance and funding to address these types of issues. The Texas Water Infrastructure Coordination Committee (TWICC) was formed with representation from stakeholders, funding entities, and federal and state partners to identify water and wastewater infrastructure and compliance issues and to seek affordable, sustainable and innovative funding strategies for the protection of public health. If you feel your system could benefit from the TWICC, please let us know so that we can discuss the matter with you.

The PWS is also required to comply with all applicable Texas regulations in Title 30 Texas Administrative Code (TAC), Chapter 290, Subchapter D. Most treatment options require the submittal of engineering plans and specifications to the Texas Commission on Environmental Quality (TCEQ) for review and approval as indicated in 30 TAC § 290.39(j). The engineering plans and specifications and any pilot study report must be prepared by a Texas licensed professional engineer as required in 30 TAC §§ 290.39(d)(1) and 290.42(g), respectively. Please send engineering submittals to the TCEQ's Public Drinking Water Section address as referenced in paragraph K of the Order and include the EPA Docket Number.

If you need assistance, or have questions regarding the Order, please contact Mr. Mehdi Taheri, of my staff, at (214) 665-2298.

Re: Administrative Order, Docket Number: SDWA-06-2013-1291
PWS ID Number: TX0850012

Dear Ms. Cash:

Enclosed is an Administrative Order (Order) issued to you for violation of the Safe Drinking Water Act (Act), 42 U.S.C. § 300f, *et seq.*, and its implementing regulations, 40 C.F.R. Part 141. The Environmental Protection Agency (EPA) finds that you own or operate the public water system (PWS) identified in the Order and are therefore subject to these regulations. The Order also requires certain actions and information demands.

This Order requires immediate compliance with the maximum contaminant level (MCL) for uranium as set forth in Section 1412 of the Act, 42 U.S.C. § 300g-1. If immediate compliance is not possible, you must submit a treatment alternative with a construction and/or repair schedule that will achieve compliance no later than eighteen (18) months from the effective date of the enclosed Order. Compliance with the MCL is based on a running annual average. As described in the enclosed Order, you are required to deliver drinking water that meets the national standards for uranium and to conduct quarterly monitoring to ensure compliance with the MCL. Please be aware that failure to comply with this Order may subject you to additional enforcement action by EPA, including the initiation of legal proceedings to seek monetary penalties.

EPA also wants you to be aware of a new process in Texas that was created to help facilities secure technical assistance and funding to address these types of issues. The Texas Water Infrastructure Coordination Committee (TWICC) was formed with representation from stakeholders, funding entities, and federal and state partners to identify water and wastewater infrastructure and compliance issues and to seek affordable, sustainable and innovative funding strategies for the protection of public health. If you feel your system could benefit from the TWICC, please let us know so that we can discuss the matter with you.

The PWS is also required to comply with all applicable Texas regulations in Title 30 Texas Administrative Code (TAC), Chapter 290, Subchapter D. Most treatment options require the submittal of engineering plans and specifications to the Texas Commission on Environmental Quality (TCEQ) for review and approval as indicated in 30 TAC § 290.39(j). The engineering plans and specifications and any pilot study report must be prepared by a Texas licensed professional engineer as required in 30 TAC §§ 290.39(d)(1) and 290.42(g), respectively. Please send engineering submittals to the TCEQ's Public Drinking Water Section address as referenced in paragraph K of the Order and include the EPA Docket Number.

If you need assistance, or have questions regarding the Order, please contact Mr. Mehdi Taheri, of my staff, at (214) 665-2298.

Sincerely,

John Blevins
