

### 6.11.3 Air Quality Surveillance: Ozone

The State of North Dakota will maintain an ozone network as long as the need for ozone data exists. The number and location of samplers will be determined by the State's need in accordance with Section 6.8. The current installed network (October 2008) is listed in the following table and displayed in Map 3. As revisions are made to the monitoring network, an updated description of the network will be available from the Department.

#### Ozone Sites

Bismarck Residential

Beulah-North

Dunn Center

Fargo NW

Hannover

Lostwood NWR

TRNP - NU

\*TRNP - SU

- \* TRNP-SU is a National Park Service site operated by the Department.
