Hi Roseana,

Attached are EPA's comments on the Unlimited Performance Products' Title V renewal permit. These comments relate to 40 CFR Part 64 - CAM and clarification of the compliance method(s) for the source. It is likely many of the comments may be addressed by revising the statement of basis prior to issuing the final permit. However, if significant additions to the permit are needed (e.g. CAM), then it may require the permit to be public noticed again before issuing the final permit. Please let me know what revisions will be made to the permit so we can discuss whether public noticing is required.

If you would like assistance in determining the applicability of CAM please let me know. The exemptions contained in 40 CFR 64.2(b) are always good to keep in mind.

I am more than willing to provide assistance in helping Mojave streamline its CAM applicability analysis process, as it appears you may not have done this yet.
