<sup>1</sup> Cleaning and painting activities qualify as trivial if they are not subject to VOC or HAP control requirements. Asphalt batch plant owners/operators must still get a permit if otherwise required.

<sup>2</sup> "Moved by hand" means it can be moved without the assistance of any motorized or non-motorized vehicle, conveyance or device.

<sup>3</sup> Brazing, soldering and welding equipment, and cutting torches related to manufacturing and construction activities that emit HAP metals are more appropriate for treatment as unpermitted equipment. Brazing, soldering, welding and cutting torches directly related to plant maintenance and upkeep and repair or maintenance shop activities that emit HAP metals are treated as trivial and listed separately in this appendix.

<sup>4</sup> Many lab fume hoods or vents might qualify for treatment as unpermitted equipment.

<sup>5</sup> Exemptions for storage tanks containing petroleum liquids or other volatile organic liquids should be based on size limits such as storage tank capacity and vapor pressure of liquids stored and are not appropriate for this list.

**Title V Compliance Status Report**

To provide the compliance status of your facility with applicable federally enforceable requirements and identify other local-only requirements, complete this form and attach it to a completed compliance certification Form 500-A2. As appropriate, all submittals of Form 500-C2 as appropriate should also be attached to this form.

**Section I - Operator Information**

**1. Facility Name (Business Name of Operator That Appears On Permit):**

Colton Sanitary Landfill

**2. Valid AQMD Facility ID (Available On Permit Or Invoice Issued By AQMD):**

058044

**PROCEDURES FOR DETERMINING COMPLIANCE STATUS**

1. **Equipment verification:** Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2. **Identify applicable requirements\*:** Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility. The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process.  
Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3. **Identify additional applicable requirements\*:** Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4. **Identify any requirements that do not apply to a specific piece of equipment or process:** Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5. **Identify SIP-approved rules that are not current AQMD rules:** Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. \*\*
6. **Identify Local-Only Enforceable Regulatory Requirements:** Use Section V to identify AQMD rules that are not SIP-approved and are not federally enforceable.
7. **Determine compliance:** Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. If any piece of equipment is not in compliance with any of the applicable requirements, complete and attach Form 500-C2 in addition to Form 500-A2.

\* The following AQMD rules and regulations are not required to be included in Section II and do not have to be added to Section III: Regulation I, List and Criteria in Regulation II, Rule 201, Rule 201.1, Rule 202, Rule 203, Rule 205, Rule 206, Rule 207, Rule 208, Rule 209, Rule 210, Rule 212, Rule 214, Rule 215, Rule 216, Rule 217, Rule 219, Rule 220, Rule 221, Regulation III, Regulation V, Regulation VIII, Regulation XII, Regulation XV, Regulation XVI, Regulation XIX, Regulation XXI, Regulation XXII, and Regulation XXX.

\*\* Emission units adversely affected by the gap between current and SIP-approved versions of rules may initially be placed in a non-Title V portion of the permit

**Section III - Supplemental Identification of Specific Requirements**

Complete this section only if there is a specific requirement (i.e., rule reference, test method, or MRR requirement) that is:

1. Listed for a specific type of equipment or process in Section II of this form & **DOES NOT** pertain to a specific device at your facility\*; OR,
2. Is **NOT** Listed for a specific type of equipment or process in Section II of this form but it **IS** applicable to a specific device at your facility.

**NOTES:**

1. For any specific requirement, test method, or MRR requirement that is identified as "Remove," attach additional sheets to explain the reasons why the specific requirement does not pertain to the device listed.
2. All boxes that are checked in Section II and any additional requirements identified in this section as "Add" will be used to determine the facility's compliance status. This information will be used to verify the certification statements made on Form 500-A2.
3. Do not use this section to identify equipment that is exempt from specific rule requirements. Your equipment is automatically considered to be in compliance with the rule that specifically exempts the equipment from those requirements.
4. Listing any requirement that does not apply to a specific piece of equipment in this section will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and approved by the AQMD.

\* If this section is completed as part of the initial Title V application & there is no device number assigned, refer to the existing permit or application number in this column.

**Title V - Compliance Assurance Monitoring (CAM) Applicability Determination for Initial, Renewal, & Significant Permit Revision**

This form is required as part of an initial, significant permit revision, or renewal Title V application. If your Title V facility has control devices in use, the CAM rule may apply. Follow the instructions on the reverse side of this form to determine whether your facility is subject to CAM requirements.

**Section I - Operator Information**

1. Facility Name (Business Name of Operator That Appears On Permit):

Colton Landfill

2. Valid AQMD Facility ID (Available On Permit Or Invoice Issued By AQMD):

058044

**Section II - CAM Status Summary for Emission Units**

3. Based on the criteria in the instructions (check one and attach additional pages as necessary):

a.  The emission units identified below are subject to the CAM rule<sup>1</sup> and a CAM plan<sup>2</sup> is attached for each affected emissions unit:

b.  There are no emission units with control devices at this Title V facility that are subject to the CAM rule.

Emission Unit <sup>3</sup> (Application, Permit or Device No.)	Equipment Description <sup>4</sup>	Uncontrolled Emissions		Connected to Control Unit <sup>3</sup> (Application, Permit or Device No.)	Equipment Description <sup>4</sup>	Controlled Emissions	
		Pollutant	PTE <sup>5</sup> (tons/year)			Pollutant	PTE <sup>5</sup> (tons/year)
F37190	Flare, Enclosed Landfill Gas	various		F37190	Flare, Enclosed Landfill Gas	various	

<sup>1</sup> For more detailed information regarding the CAM rule applicability, refer to Title 40, Chapter I, Part 64, Section 64.1 of the Code of Federal Regulations (40 CFR Part 64, Section 64.1). This also can be accessed via the internet at: [http://www.access.gpo.gov/nara/cfr/waisidx\\_99/40cfr64\\_99.html](http://www.access.gpo.gov/nara/cfr/waisidx_99/40cfr64_99.html).

<sup>2</sup> Only one CAM plan is required for a control device that is common to more than one emissions unit, or if an emissions unit is controlled by more than one control device similar in design and operation. If the control devices are not similar in design and operation, one plan is required for each control device.

<sup>3</sup> List all new and existing emission units and the connected control devices either by AQMD application, permit or device number. When the emission unit is new and has not yet been assigned an application number, leave this column blank.

<sup>4</sup> Provide a brief equipment description of the emission units and control devices by indicating equipment type, make, and model and serial numbers as appropriate.

<sup>5</sup> Potential to Emit

## Instructions for Determining Applicability to the CAM Rule

With the exception of emission units that are municipally-owned backup utility power units as described by 40 CFR Part 64, Section 64.2(b)(2)<sup>1</sup>, the CAM rule is applicable to each emission unit (existing and new construction) at a Title V facility that meets ALL of the following criteria<sup>2</sup>:

1. The emission unit is subject to an emission limitation or standard<sup>3</sup> (often found in permit conditions);
2. The emission unit uses a control device to achieve compliance with the emission limitation or standard; and,
3. The emission unit has a potential to emit (PTE)<sup>4</sup>, either pre-control or post-control depending on the type of Title V application<sup>5</sup>, that exceeds or is equivalent to any of Title V major source thresholds shown in the following table:

<b>CAM Potential to Emit (PTE) Emission Threshold<sup>6</sup> For Individual Emission Units at a Title V Facility</b> (tons per year)			
<b>Pollutant</b>	<b>South Coast Air Basin (SOCAB)</b>	<b>Riverside County Portion of Salton Sea Air Basin (SSAB) and Los Angeles County Portion of Mojave Desert Air Basin (MDAB)</b>	<b>Riverside County Portion of Mojave Desert Air Basin (MDAB)</b>
VOC	10	25	100
NOx	10	25	100
SOx	100	100	100
CO	50	100	100
PM-10	70	70	100
1 HAP <sup>7</sup>	10	10	10
2+ HAPs	25	25	25

1 The facility must attach the documentation required by 40 CFR Part 64, Section 64.2 (b)(2) to demonstrate that the backup utility power unit only operates during periods of peak demand or emergency situations; and has actual emissions, averaged over the last three calendar years of operation, less than 50% of the major source emission thresholds.

2 Additional information about the CAM rule can be found on EPA's website at <http://www.epa.gov/ttnemc01/cam.html>.

3 Only emission limitations and standards from an "applicable requirement" for emission units with control devices are subject to the CAM rule. Applicable requirements are federally-enforceable requirements that are rules adopted by AQMD or the State that are approved by EPA into the State Implementation Plan (SIP) (i.e. "SIP-approved rules"). Refer to Form 500-C1 for the latest versions of SIP-approved and non-SIP approved rules.

For emissions units with control devices that are subject to following federally enforceable requirements, the CAM rule does NOT apply: 1) NSPS (40 CFR Part 60); 2) NESHAP (40 CFR Parts 61 and 63); 3) Title VI of the Federal Clean Air Act (CAA) for Stratospheric Ozone Protection; 4) Title IV of the CAA and SCAQMD Regulation XXXI for Acid Rain facilities; 5) SCAQMD Regulation XX - RECLAIM; 6) Any emission cap that is federally enforceable, quantifiable, and meets the requirements in 40 CFR Part 70, Section 70.4 (b)(12); and 6) Emission limitation or standards for which a continuous compliance determination method is required.

4 To calculate the pre-control device and post-control device PTE for emission units at the facility, refer to the Title V Technical Guidance Document Version 4.0, Appendix A (pages A-12 through A-23). The calculations are used to determine the CAM applicability according to 40 CFR Part 64, Section 64.5 of the CAM rule.

5 For initial Title V or significant permit revision applications submitted after April 20, 1998, use the post-control device PTE emissions to determine CAM applicability. For Title V permit renewal applications (submittals will begin in 2002), the CAM applicability will be based on the pre-control device PTE.

6 The following table is based on Rule 3001 (Amended November 14, 1997) and Rule 3008 (Amended March 16, 2001). Please be advised that the threshold values are subject to change based on rule amendments.

### Compliance Assurance Monitoring Plan Colton Landfill (Facility ID No. 058044)

Emissions Unit: Flare Station, Enclosed Landfill/Digester Gas (Permit # F37190)

As stated in 40 CFR Part 64, a CAM Plan must address the following seven items:

1. *Describe the indicators to be monitored [Section 64.4(a)(1)]*

The Colton Landfill Flare Station (under Permit # F37190) includes 4 landfill gas blowers, 2 knock out vessels, 2 John Zink Flares and 2 condensate injection systems. The on-site technician routinely monitors numerous indicators throughout the station including, but not limited to:

- Combustion Temperature (°F)
- Landfill Gas Flow Rate (scfm)
- Landfill Gas Composition (% by volume)
- System Pressure (inlet, outlet and differential)

(For a list of routinely monitored components see attached Flare Station Monitoring Form)

2. *Describe the ranges or the process to set indicators ranges [Section 64.4(a)(2)]*

The Flare Station is furnished with continuous monitoring/alarm equipment such as pressure transducers, shut off/failure alarms and an auto-dialer system that is set to notify personnel if any predetermined limit is exceeded. The ranges and limits set on the monitoring indicators are listed in the aforementioned permit and are therefore not repeated herein. Please note that incorporation of an existing permit by reference avoids revisiting an issue that has been previously researched, field tested, and has received AQMD review/approval.

3. *Describe the performance criteria for the monitoring, including [Section 64.4(a)(3)]*

- a) *Specifications for obtaining representative data*
- b) *Verification procedures to confirm the monitoring's operational status*
- c) *Quality assurance and control procedures*
- d) *Monitor frequency*
  - i. *4 time per hour (minimum) if post-control emissions are  $\geq$ MST; or*
  - ii. *1 time per day (minimum) if post-control emissions are  $<$ MST*

The on-site technician routinely monitors, calibrates, and performs maintenance on all flare station monitoring equipment. Additionally, the flow and combustion temperature are measured and recorded on a data logger on a minimum 15 minute basis. The specific performance criteria for monitoring are listed in the aforementioned permit and for purposes of brevity and to reduce the possibility of errors, they are not repeated herein. Please note that incorporation of an existing permit by reference avoids revisiting an issue that has been previously researched, field tested, and has received AQMD review/approval.

4. *Describe indicator ranges and performance criteria for CEMS, COMS, or PEMS [Section 64.3(a)(4)]*

Neither a continuous opacity monitoring system (COMS) nor predictive emissions monitoring system (PEMS) are currently installed at the Flare Station. The facility does, however, have a continuous emissions monitoring system (CEMS) which measures gas temperature and flow rate. The indicator ranges and performance criteria are listed in Permit # F37190 and the previous Title V permit. Please note that this citation to existing data that is already in the possession of AQMD promotes sustainability and reduces the volume of repeated files submitted to AQMD.

5. *Provide a justification for the use of parameters, ranges, and monitoring approaches [Section 64.4(b)]*

Most limits, parameters or ranges for monitoring devices come from applicable regulations that control the amounts of toxins being released into the atmosphere. Furthermore, some operating limits (not predetermined by any regulations) are set by the Senior Project Engineers to assure the facility operates continually in compliance. Most these methods have been the subject of research, meetings, and field tests and gone through AQMD inspection/verification. As noted by the sites continuous compliance and lack of violations in recent years, the set limits are achieving the goal of reducing emissions.

6. *Provide emissions test data [Section 64.6(c)]*

Due to the voluminous size of emissions test data and because multiple reports containing this information have been submitted to AQMD in the recent past (Annual Emissions Reports, 1150.1 Reports, etc...), they are not repeated herein. Please note that this citation to existing data which are already in the possession of AQMD promotes sustainability and reduces the volume of repeated files submitted.

7. *And, if necessary, provide an implementation plan for installing, testing, and operating the monitoring [Section 64.4(d)]*

An implementation plan is not necessary for this CAM plan. The monitoring procedures have proven to be effective throughout the years given the history of compliance with applicable regulations and oversight by AQMD.
