Re: LADWP Haynes Generating Station, Facility ID 800074

Dear Mr. Rios:

The South Coast Air Quality Management District (AQMD) has received and reviewed an application from the Los Angeles Department of Water and Power (LADWP) for a minor permit revision to the Title V facility permit of its Haynes Generating Station (HGS). A summary of the applications is provided in next table.

Application	Device #	Description	Proposed Action
451886	D57-69	Fuel Oil Unloading Facility	Remove several components
451776	D53	Emergency IC Engine	Change of conditions to be in compliance with Rule 1470
451885			Facility Permit Minor Modification

The AQMD is required under Rule 3005 (c) to provide a copy of the proposed permit to the EPA Administrator for a 45-day review. As such, a copy of the proposed revision to the existing Title V permit is attached along with our engineering analysis for your review. If you have any questions or wish to provide comments regarding this project, please call Mr. Li Chen at (909) 396-2426.

Very truly yours,

*Michael D. Mills*
