Hi Ari,

The following are the responses to the comments regarding the Draft Title V permit for your facility.

Since the first two comments are related to the Periodic Monitoring Requirements specified in the permit, I first like to go over some background information regarding periodic monitoring as to why are they required and how they were developed.

Periodic monitoring is required by Title V for SIP-approved, federally enforceable rules that do not contain sufficient monitoring requirements to assure compliance with the emission limitations or other requirements. In addition, it is also required for any air pollution control equipment installed and operated to meet the requirements of a SIP-approved rule specified under Regulation IV, XI, or XIII.

To satisfy this requirement, during the Title V permit development, the District identified all emission limitations or other requirements, as well as the monitoring, testing and recordkeeping requirements in each SIP-approved, federally enforceable SCAQMD rule (or the latest SCAQMD developed version of rule). Where the rule did not specify adequate monitoring for a specific requirement, the District made recommendations to fill the gap. A draft document was published in August 1997, and a public consultation was held to solicit public comments. The District carefully reviewed all public comments, and significantly revised the guidelines. The District Periodic Monitoring Guidelines were finalized in 1997 and are available on the District website. In addition, CAPCOA/CARB/EPA Region IX developed periodic monitoring for generally applicable requirements in the SIP (June 1999) to be used by the air District for their Title V facilities. As a Result, all periodic monitoring requirements specified in a Title V permit were based on the above guidelines or on a case by case basis.

**Response to comment regarding visible emissions periodic monitoring condition No.3 listed on page 5 of Section D of the permit.**

“Rule 401-VISIBLE EMISSIONS”, specifies that “A person shall not discharge into the atmosphere from any single source of emission whatsoever any air contaminant for a period or periods aggregating more than three minutes in any one hour which is:

As dark or darker in shade as that designated No. 1 on the Ringelmann Chart, as published by the United States Bureau of Mines; or

Of such opacity as to obscure an observer's view to a degree equal to or greater than does smoke described in subparagraph (b)(1)(A) of this rule. “

This requirement is listed under facility wide condition No.1 on page 3 of Section D of the Title V permit. This requirement is applicable to all sources of emissions at a facility except as specified by the Rule. Since the polymer concrete casting process equipment are a potential source of visible

emissions and subject to Rule 401, periodic monitoring condition No.3 was added to this permit unit to satisfy the gap-filling requirement for Rule 401 listed on page 4 of the SCAQMD "Periodic Monitoring Guidelines for Title V Facilities".

Further, Rule 102-Definitions of Terms, defines atmosphere as "Atmosphere means the air that envelopes or surrounds the earth. Where air pollutants are emitted into a building not designed specifically as a piece of air pollution control equipment, such emission into the building shall be considered an emission into the atmosphere. " Consequently, all Rules and Regulations including Rule 401 are applicable to equipment operated under roofed structures.

**Response to comment regarding once every five years source test requirement listed on page 10 of Section D of the permit.**

The requirement to source test the thermal oxidizer once every five years is not a new requirement. The Title V permit is valid for five years only and the source testing requirement was listed as once during the life of the permit meaning once every five years the permit is renewed. The condition was changed in order to clarify the requirement. Please note that the District specifies this requirement for every Title facility that utilizes a thermal oxidizer to control VOC emissions where the pre-control emissions to the oxidizer are greater than 10 tons per year. Also, the District has started implementing this requirement for non-Title facilities.

**Response to comment regarding Rule 1147 NOx concentration limit of 60 ppm applicable to the thermal oxidizer.**

Rule 3004-Permit Type and Content, of Title V requires the permit to include all applicable emission limitations in the permit. Accordingly, the 60 ppmv NOx concentration limit of Rule 1147 applicable to the start-up burner is listed. The permit purposely does not specify when the limit will become applicable to a piece of equipment. The limit will become applicable as specified by the Rule, as long as you maintain records of when the equipment was installed.

Based on the information submitted with the application for the thermal oxidizer, the burner manufacturer has indicated that the burner is capable of emitting 90 ppmv NOx at 3% Oxygen. Thus, the current burner may not be capable of meeting the concentration limit. The operating limit of 124 minutes per day applicable to the start-up burner was imposed solely so that Best Available Control Technology (BACT) requirements are not triggered.

Rule 1147 NOx concentration limit is not applicable when the thermal oxidizer is incinerating VOC from the equipment being vented and or when natural gas injection system is utilized to maintain the temperature in the thermal oxidizer. The Rule requires only the start-up burner to meet the NOx concentration limit of 60 ppmv. Basically when testing is conducted to demonstrate compliance with the concentration limit, only the start-up burner should be operational.

**Comment regarding Rule 219 equipment removed from the draft permit.**

The Hand Lay, Brush and Roll Up Resin Operations was not removed from the draft permit, it is listed on page 14 of Section D of the draft permit. The Closed Mold Operations will be added back

in the permit. However, please be aware that the District is reviewing the status of this operation with regard to permitting requirements, and you will be notified once the review is complete.

We are planning to send the proposed permit for your facility to EPA and public review tomorrow. I will email a complete copy of the documents as it relates to the proposed Title V permit. If you have any questions regarding the above or if you need any clarification, please email me or call me at (909) 396-3275.

Thanks.

**Subject:** Comments Regarding Armorcast Product Company Title V Draft Permit/Renewal.

**Reference:** SCAQMD Letter Dated January 21, 2014 Titled "DRAFT PERMIT FOR TITLE V RENEWAL APPLICATION"

Dear Mr. Mandilawi,

As requested in the SCAQMD referenced letter above, Armorcast has reviewed the Draft Title V Permit and have the following comments, concerns, and questions:

- **Section D, Page 5 "Periodic Monitoring"** – This is a new requirement that has been added to the proposed draft permit; why? There are no stack or stack emission points from the equipment listed under the Permit No. G1144 Polymer Concrete Manufacturing Process "Equipment Section". All listed equipment in operated under roofed structures and have no affiliated bag houses.
- **Section D, Page 10. Paragraph 17.A "THE TEST (i.e., source test) SHALL BE CONDUCTED ONCE EVERY FIVE YEARS"** – This is a new requirement that has been added to the proposed draft permit. The original permit had a single source test that needed to be conducted at least once during the life of the permit and no later than December 19, 2012, which was done. Why has requirement to conduct another source test been added?
- **Section D, Page 11. "Emission and Requirements", Paragraph 18. "NOx: 60PPMV, Rule 1147"** – This is a new requirement that has been added to the proposed draft permit.

Rule 1147 paragraph (g)(4) currently states: "*New afterburners, degassing units, thermal oxidizers, catalytic oxidizers, vapor incinerators, and spray booth make-up air heaters installed for use at a specific facility after December 5, 2008 and before January 1, 2011 are exempt from the emission limit in Table 1 until July 1 of the year the unit is 15 years old.*" Moreover, I believe the current and proposed draft permit incorporates a maximum burner time (i.e., 124 minutes in any one day) the burner can be on to reach the 1,500F° minimum process bed temperature before either natural gas injection and/or styrene emissions from manufacturing input sources take over to

maintain this 1,500°F combustion temperature because: 1) the District was cognizant the RTO unit was not configured with a low NOx burner; and 2) to comply with the maximum 60 PPMV start up gas fired burner requirement. Therefore, we believe we already are exempt from this requirement.

Furthermore, current Rule 1147 Table 1 Afterburner, Degassing Unit, Remediation Unit, Thermal Oxidizer, Catalytic Oxidizer or Vapor Incinerator<sup>1</sup> requirements state: "NOx emission limit applies to burners in units fueled by 100% natural gas that are used to incinerate air toxics, VOCs, or other vapors; or to heat a unit. The emission limit applies solely when burning 100% fuel and not when the burner is incinerating air toxics, VOCs, or other vapors. The unit shall be tested or certified to meet the emission limit while fueled with natural gas", which is misleading. What does "while fueled with natural gas mean and application (i.e., the period to start up the thermal oxidizer unit gas fired burner until the unit reaches/sustains natural gas and/or VOC emission process injection enthalpy)?

- **Section D, Pages 12 and 13 "RULE 219 EQUIPMENT"** – Closed Mold Operations and Hand Lay, Brush and Roll Up Resin Operations have been removed from the proposed draft permit; why? This greatly concerns us for the following reasons: 1) we originally had permitted bag houses in the press molded resin mixing bulk molding compound operation; the District removed those permit from the original Title V permit as unnecessary since they supported already Rule 219 exempt mixers (i.e., mixers are under 230 gallons) and they would just add the closed molding operation in its entirety as an exemption to Rule 219 for community transparency and documentation: 2) what now prevents SCAQMD from issuing citations for unpermitted bag houses used in the closed molding operations? In fact, we had an annual Title V inspection was conducted last year in which the inspector wanted to know why the bad houses and resin mixing equipment was not permitted. I was able to point to the current Title V Rule 219 Exempt section to avoid a citation.

Sincerely,

ARMORCAST PRODUCTS COMPANY

**PROCEDURES FOR DETERMINING COMPLIANCE STATUS**

1. **Equipment verification:** Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2. **Identify applicable requirements\*:** Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility. The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process.  
Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3. **Identify additional applicable requirements\*:** Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4. **Identify any requirements that do not apply to a specific piece of equipment or process:** Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5. **Identify SIP-approved rules that are not current AQMD rules:** Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. \*\*
6. **Identify Local-Only Enforceable Regulatory Requirements:** Use Section V to identify AQMD rules that are not SIP-approved and are not federally enforceable.
7. **Determine compliance:** Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. If any piece of equipment is not in compliance with any of the applicable requirements, complete and attach Form 500-C2 in addition to Form 500-A2.

\* The following AQMD rules and regulations are not required to be included in Section II and do not have to be added to Section III: Regulation I, List and Criteria in Regulation II, Rule 201, Rule 201.1, Rule 202, Rule 203, Rule 205, Rule 206, Rule 207, Rule 208, Rule 209, Rule 210, Rule 212, Rule 214, Rule 215, Rule 216, Rule 217, Rule 219, Rule 220, Rule 221, Regulation III, Regulation V, Regulation VIII, Regulation XII, Regulation XV, Regulation XVI, Regulation XIX, Regulation XXI, Regulation XXII, and Regulation XXX.

\*\* Emission units adversely affected by the gap between current and SIP-approved versions of rules may initially be placed in a non-Title V portion of the permit

#### 1. Introduction and Scope of Permit

Title V is a national operating permit program for air pollution sources. Facilities subject to Title V must obtain a Title V permit and comply with specific Title V procedures to modify the permit. This permit replaces the facility's other existing permits. Title V does not necessarily include any new requirements for reducing emissions. It does, however, include new permitting, noticing, recordkeeping, and reporting requirements.

Pursuant to Title V of the federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, each facility is required to submit a Title V renewal application and requested the AQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information provided in the facility's Title V renewal application and all rules and regulations that are currently applicable to the facility.

The AQMD implements Title V through Regulation XXX – Title V Permits, adopted by the AQMD Governing Board in order to comply with EPA's requirement that local air permitting authorities develop a Title V program. Regulation XXX was developed with the participation of the public and affected facilities through a series of public workshops, working group meetings, public hearings and other meetings.

The Title V major source threshold for a particular pollutant depends on the attainment status of the pollutant. NO<sub>2</sub>, SO<sub>2</sub>, and CO are in attainment with federal standards. The status of lead is

nonattainment. The status for PM-10 is serious nonattainment. The status for ozone is currently extreme nonattainment.

A Title V renewal permit is proposed to be issued to cover the operations of Armorcast Products Company located at 13230 Saticoy Street, North Hollywood, CA 91605. This facility is subject to Title V requirements because it is a major source.

## **2. Facility Description**

This is an existing Title V facility applying for a Title V permit renewal that is engaged in polymer concrete manufacturing. The facility operates spray booths, mixers, and other supporting equipment. Volatile Organic Compounds (VOC) emissions from the spray booths and resin mixing and pouring operations are vented to an air pollution control equipment regenerative thermal oxidizer.

## **3. Construction and Permitting History**

The facility has been in constant operation with a Title V permit at this location since 2009.

## **4. Regulatory Applicability Determinations**

Applicable legal requirements for which this facility is required to comply are required to be identified in the Title V permit (for example, Section D, E, and H of the proposed Title V permit). Applicability determinations (i.e., determinations made by the District with respect to what legal requirements apply to a specific piece of equipment, process, or operation) can be found in the Engineering Evaluations. This facility is not subject to any NSPS requirements. The facility however, is subject to 40 CFR63 Subpart WWWW-National Emission Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production. The requirements of this NESHAP are reflected in the Title V permit.

## **5. Monitoring and Operational Requirements**

Applicable monitoring and operational requirements for which the facility is required to comply are identified in the Title V permit (for example, Section D, F, and J and Appendix B of the proposed Title V permit). Discussion of any applicable operational requirements can be found in the Engineering Evaluations. All periodic monitoring requirements were developed using strict adherence to the following applicable guidance documents: SCAQMD Periodic Monitoring Guidelines for Title V Facilities (November 1997); CAPCOA/CARB/EPA Region IX Periodic Monitoring Recommendations for Generally Applicable Requirements in SIP (June 1999); and CAPCOA/CARB/EPA Region IX Recommended Periodic Monitoring for Generally Applicable Grain Loading Standards in the SIP: Combustion Sources (July 2001).

VOC emissions from the spray booths and resin mixing and pouring operation are operated within two permanent total enclosures (PTE) and the PTE's are vented to an air pollution control system regenerative thermal oxidizer. The uncontrolled VOC emission to the oxidizer is greater than the major source threshold for VOC of 10 tons per year. As a result, the air pollution control equipment is subject to the Compliance Assurance Monitoring (CAM) requirements of

40 CFR Part 64. Permit conditions have been added to satisfy the CAM requirements. Such permit conditions were developed using the design criteria and other pertinent requirements identified in 40 CFR 64- Compliance Assurance Monitoring and Technical Guidance Document and in the August 1998 Revised Draft CAM.

## 6. Permit Features

### Permit Shield

A permit shield is an optional part of a Title V permit that gives the facility an explicit protection from requirements that do not apply to the facility. A permit shield is a provision in a permit that states that compliance with the conditions of the permit shall be deemed compliance with all identified regulatory requirements. To incorporate a permit shield into the Title V permit involves submission of applications for change of conditions for each equipment affected by the permit shield. Permit shields are addressed in Rule 3004 (c). This facility has not applied for a permit shield.

### Streamlining Requirements

Some emission units may be subject to multiple requirements which are closely related or redundant. The conditions may be streamlined to simplify the permit conditions and compliance. Emission limits, work practice standards, and monitoring, recordkeeping, and reporting requirements may be streamlined. Compliance with a streamlined condition will be deemed compliance with the underlying requirements whether or not the emission unit is actually in compliance with the specific underlying requirement. This facility has not applied for any streamlined conditions.

## 7. Summary of Emissions and Health Risks

**Criteria Pollutant Emissions (tons/year)**  
**Annual Reported Emissions for Reporting Period 2012**

Pollutant	Emissions (tons/year)
NO <sub>x</sub>	0
CO	0
VOC	7.1
PM	0
SO <sub>x</sub>	0

### **Toxic Air Contaminants Emissions (TAC)**

No TAC's were reported for reporting period 2012.

### **Health Risk from Toxic Air Contaminants**

The facility is subject to review by the Air Toxics Information and Assessment Act (AB2588). The AQMD is tracking the status of the facility under AB2588.

## **8. Compliance History**

As noted, the facility has been in constant operation with a Title V permit since 2009. The facility has been subject to both self-reporting requirements and AQMD inspections. The facility has had no Notice to Comply issued in the last two years. However, an odor complaint was received for the facility on September 5, 2012. The District responded to the complaint by inspecting the facility and identified a faint odor source from the shipping and receiving area. This was brought to the attention of the facility and since then no odor complaints have been received by the District. In addition, the facility was issued a Notice of Violation on 5/30/2013 for failure to submit the semi-annual monitoring report for the period of July 1, 2012 through December 31, 2012. The facility is currently operating in compliance with all applicable rules and permit conditions.

## **9. Compliance Certification**

By virtue of the Title V permit application and issuance of this Title V renewal permit, the reporting frequency for compliance certification for the facility shall be annual.

**Form 500-C1**

**Title V Compliance Status Report**

To provide the compliance status of your facility with applicable federally enforceable requirements and identify other local-only requirements, complete this form and attach it to a completed compliance certification Form 500-A2. As appropriate, all submittals of Form 500-C2 as appropriate should also be attached to this form.

**Section I - Operator Information**

**1. Facility Name** (Business Name of Operator That Appears On Permit)  
ARMORCAST PRODUCTS COMPANY

**2. Valid AQMD Facility ID** (Available On Permit Or Invoice Issued By AQMD): 110577

**PROCEDURES FOR DETERMINING COMPLIANCE STATUS**

1. **Equipment verification:** Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2. **Identify applicable requirements\*:** Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility. The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process.  
Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3. **Identify additional applicable requirements\*:** Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4. **Identify any requirements that do not apply to a specific piece of equipment or process:** Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5. **Identify SIP-approved rules that are not current AQMD rules:** Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. \*\*
6. **Identify Local-Only Enforceable Regulatory Requirements:** Use Section V to identify AQMD rules that are not SIP-approved and are not federally enforceable.
7. **Determine compliance:** Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. If any piece of equipment is not in compliance with any of the applicable requirements, complete and attach Form 500-C2 in addition to Form 500-A2.

\* The following AQMD rules and regulations are not required to be included in Section II and do not have to be added to Section III: Regulation I, List and Criteria in Regulation II, Rule 201, Rule 201.1, Rule 202, Rule 203, Rule 205, Rule 206, Rule 207, Rule 208, Rule 209, Rule 210, Rule 212, Rule 214, Rule 215, Rule 216, Rule 217, Rule 219, Rule 220, Rule 221, Regulation III, Regulation V, Regulation VIII, Regulation XII, Regulation XV, Regulation XVI, Regulation XIX, Regulation XXI, Regulation XXII, and Regulation XXX.

\*\* Emission units adversely affected by the gap between current and SIP-approved versions of rules may initially be placed in a non-Title V portion of the permit

  - A. AS DARK OR DARKER IN SHADE AS THAT DESIGNATED NO. 1 ON THE RINGELMANN CHART, AS PUBLISHED BY THE UNITED STATES BUREAU OF MINES; OR
  - B. OF SUCH OPACITY AS TO OBSCURE AN OBSERVER'S VIEW TO A DEGREE EQUAL TO OR GREATER THAN DOES SMOKE DESCRIBED IN SUBPARAGRAPH (A) OF THIS CONDITION.  
[RULE 401]
  
2. MATERIAL SAFETY DATA SHEETS FOR ALL MATERIALS USED AT THIS FACILITY AND SUBJECT TO DISTRICT RULES SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.  
[RULE 109, 1303(b)(2)-OFFSET]
  
3. THE VOC EMISSIONS FROM THE USE OF POLYESTER RESIN AT THIS FACILITY SHALL BE CALCULATED USING THE FOLLOWING EMISSION FACTORS AND THE VIRGIN RESIN USAGE IN POUNDS.

SPRAY BOOTHS	RESIN USAGE IN LBS x UEF* X (1 – APC OVERALL EFFICIENCY)
CASTING (NOT PADS)	[0.005 X RESIN USAGE IN LBS X (1 – APC OVERALL EFFICIENCY) + 0.0023 X RESIN USAGE IN LBS.
CASTING, PADS	[0.005 X RESIN USAGE IN LBS X (1 – APC OVERALL EFFICIENCY) + 0.0047 X RESIN USAGE IN LBS.
COMPRESSION MOLDING	0.0014 X RESIN USAGE IN LBS.

\*UEF is the appropriate Unified Emission Factor based on the virgin resin styrene monomer content and method of application  
[RULE 109, 1303(b)(2)-OFFSET]
  
4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS FROM ALL PERMITTED EQUIPMENT AND ASSOCIATED OPERATIONS AT THIS FACILITY, EXCLUDING EMISSIONS FROM THE POLYMER CONCRETE CASTING MANUFACTURING PROCESS, SHALL NOT EXCEED 1500 POUNDS IN ANY ONE CALENDAR MONTH. ASSOCIATED OPERATIONS INCLUDE, BUT ARE NOT LIMITED TO, SURFACE PREPARATION, EQUIPMENT CLEAN-UP, AND APPLICATION OF COATINGS, GELCOATS, AND RESINS INCLUDING HAND LAY-UP, OR ANY OTHER MATERIALS TO PARTS THAT ARE PREVIOUSLY OR SUBSEQUENTLY PROCESSED IN THE PERMITTED EQUIPMENT. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE FACILITY OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FROM ALL PERMITTED EQUIPMENT AND ASSOCIATED OPERATIONS. FOR EQUIPMENT THAT IS VENTED TO AIR POLLUTION CONTROL (APC) EQUIPMENT FOR VOC, THE VOC EMISSIONS SHALL BE

CALCULATED USING THE REQUIRED OVERALL CONTROL EFFICIENCY SPECIFIED IN THE PERMIT(S) FOR THE APC EQUIPMENT.  
[RULE 109, 1303(b)(2)-OFFSET]

5. TO ENSURE COMPLIANCE WITH THE EMISSION CAPS OF THIS PERMIT, THE FACILITY OPERATOR SHALL:
  - A. COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS)
  - B. KEEP ADEQUATE RECORDS FOR THE EQUIPMENT AND FACILITY TO VERIFY VOC EMISSIONS IN POUNDS AND THE APPROPRIATE VOC EMISSION FACTOR OR VOC CONTENT AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). THE RECORDS SHALL INCLUDE ANY PROCEDURES TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.
  - C. MAINTAIN A SINGLE LIST THAT INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.
  - D. RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY.

The operator shall not discharge into the atmosphere from this equipment, solid particulate matter including lead and lead compounds in excess of the rate shown in Table 405(a).

Where the process weight per hour is between figures listed in the table, the exact weight of permitted discharge shall be determined by linear interpolation.

For the purposes of this rule, emissions shall be averaged over one complete cycle of operation or one hour, whichever is the lesser time period.

Form 400-CEQA

California Environmental Quality Act (CEQA) Applicability

Mail To: SCAQMD P.O. Box 4944 Diamond Bar, CA 91765-0944

Tel (909) 396-3385 www.aqmd.gov

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)]. Refer to the attached instructions for guidance in completing this form. For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385 or (909) 396-2668

Section A - Facility Information
1. Facility Name (Business Name of Operator To Appear On The Permit): Armorcast Products Company
2. Valid AQMD Facility ID (Available On Permit Or Invoice Issued By AQMD): 110577

6. A Title V (i.e., Regulation XXX) permit renewal (without equipment modifications)?
7. A Title V administrative permit revision?
8. The conversion of an existing permit into an initial Title V permit?

If "Yes" is checked for any question in Section B, your application does not require additional evaluation for CEQA applicability. Skip to Section D - Signatures on page 2 and sign and date this form.

Section C - Review of Impacts Which May Trigger CEQA
Complete Parts I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.
Table with 4 rows and 3 columns: Yes, No, Part I - General

**PROCEDURES FOR DETERMINING COMPLIANCE STATUS**

1. **Equipment verification:** Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2. **Identify applicable requirements\*:** Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility. The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process.  
Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3. **Identify additional applicable requirements\*:** Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4. **Identify any requirements that do not apply to a specific piece of equipment or process:** Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5. **Identify SIP-approved rules that are not current AQMD rules:** Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. \*\*
6. **Identify Local-Only Enforceable Regulatory Requirements:** Use Section V to identify AQMD rules that are not SIP-approved and are not federally enforceable.
7. **Determine compliance:** Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. Re: Title V Permit Renewal Application (Facility ID: 110577) - Important Courtesy Reminder

This letter is a courtesy reminder that your facility's Title V permit, issued by the South Coast Air Quality Management District (AQMD), is set to EXPIRE within the next nine (9) months. Please review Section A of your facility's Title V permit to find the expiration date of your Title V permit.

AQMD's Rule 3003(a)(6) requires a facility to submit a timely and complete application for Title V Permit Renewal and states that, "For purposes of permit renewal, a timely application is one that is submitted at least 180 days, but no more than 545 days, prior to the date of permit expiration." As such, you must submit a "timely and complete" application for a Title V Permit Renewal at least 180 days, but no more than 545 days, prior to your facility's Title V permit expiration date, if you have not already submitted one.

If you do not submit a timely and complete Title V Permit Renewal application:

- You will be in violation of Rule 3003(a), and you may be issued a Notice of Violation for Rule 3003(a); and
- Upon expiration of your Title V Permit, the operation of your facility will not be covered under an Application Shield, according to Rule 3002(b).

To submit an application for Title V Permit Renewal, please submit the necessary forms and the applicable fees. (The applicable forms and fees can be viewed or downloaded from AQMD's website at: <http://www.aqmd.gov/permit/forms.html#titlev>. Please note that a separate compliance plan with the applicable fees must also be submitted if a Compliance Assurance Monitoring (CAM) plan is needed based on the applicability determination using Form 500-H.

If you have any questions, please contact Ken Mangelsdorf at 909-396-2420 or Mohan Balagopalan at 909-396-2704.

Sincerely,
