

NOTICE INVITING WRITTEN PUBLIC COMMENTS

NOTICE is hereby given that the Air Pollution Control Officer of the Bay Area Air Quality Management District has made a preliminary decision to issue a Synthetic Minor Operating Permit to Morton Salt Company, located at 7380 Morton Avenue, Newark, as requested under application #11358.

The proposed permit will impose federally enforceable permit conditions that limit the facility's potential to emit below the major source thresholds of 100 tons per year of particulate matter (PM10). By limiting the facility's potential to emit, the proposed permit exempts the facility from the requirements of Federal Operating Permit Program as codified in Title V of the 1990 Clean Air Act Amendments.

The Air Pollution Control Officer invites written public comment on the above application and intended action within 30 days from the date of this publication.

A summary of the application is available for public inspection at the District Headquarters, 939 Ellis Street, San Francisco, CA 94109, in the Engineering Division on the 3rd floor. Written comments should be mailed to Carol Lee at the BAAQMD, 939 Ellis Street, San Francisco CA 94109 or by e-mail to clee@baaqmd.gov.

Dated at San Francisco, the 15th day of June, 2010.

Jack P. Broadbent
Executive Officer/Air Pollution Control Officer
Bay Area Air Quality Management District
