San Francisco, CA 94105

SUBJECT: Proposed Minor Revision to the Title V Facility Permit for BP West Coast Products LLC, BP Wilmington Calciner (Facility ID# 131249).

Dear Mr. Rios,

Enclosed for your 45-day review is the proposed Title V permit revision for the facility listed above, located at 1175 Carrack Avenue, Wilmington, CA 90748. The proposed changes are considered a Minor permit revision and a public notice is not required. We are enclosing copies of the engineering evaluation and draft proposed revised permit, as shown below.

#### Section D – Permit to Operate

Application No.	Equipment	Device	Process	System	Description
517770	Scrubber	C68	1	3	Clarify that the scrubber is a "lime scrubbing system" instead of a "sodium alkali scrubbing system" as described in the EPA's PSD permit.
527388	Baghouse	C69	1	3	New Condition D28.2 to incorporate the PSD permit-required annual source test for SOx emissions at 80% or greater capacity.

In addition, the Title V permit is revised by changes to and the incorporation of the EPA-issued Prevention of Significant Deterioration (PSD) permit descriptions and requirements into the Title V permit's Section D. Upon incorporation of the proposed revisions, the PSD permit will no longer need to be separately attached to the Title V Facility permit. This revision is covered under application no. 517769.

This review request is being made via electronic submittal in order to facilitate this review. If there are specific questions or comments on the revised permit, please contact Ms. Belinda Wan, at (909) 396-2532, or by email at [bwana@aqmd.gov](mailto:bwana@aqmd.gov).

Sincerely,

Jay Chen, P.E.
