This is an existing facility applying for a Title V permit renewal that performs space research and development. The facility operates internal combustion engines, spray booths, cleaning equipment, semiconductor and integrated circuit manufacturing operation, and other supporting equipment. Particulate matter emissions from the semiconductor and integrated circuit manufacturing operation are vented to an air pollution control equipment consisting of an oxidizer and scrubbers.

Pursuant to Title V of the federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, the above facility has submitted a Title V renewal application and requested the AQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information provided in the facility's Title V renewal application and all rules and regulations that are currently applicable to the facility.

Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the AQMD based on credible information, is also available from the AQMD for public review.
