This is an existing facility applying for a Title V permit renewal that is engaged in fabric coating and curing. The facility operates two fabric coating and curing systems, a storage tank, and other supporting equipment. Volatile organic compound emissions from the fabric coating and curing systems are vented to an air pollution control equipment afterburner.

Pursuant to Title V of the federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, the above facility has submitted a Title V renewal application and requested the AQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information provided in the facility's Title V renewal application and all rules and regulations that are currently applicable to the facility.

The proposed permit is available for public review at the AQMD, 21865 Copley Dr., Diamond Bar, CA 91765 and at the Los Angeles Public Library,

Science, Technology, and Patents Department, 630 West 5th Street, Los Angeles, CA 90071. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the AQMD based on credible information, is also available from the AQMD for public review.
