This is an existing facility applying for a Title V permit renewal that is engaged in the manufacturing of iron core inductors that are used in the electronics industry. The facility operates spray booths, drying ovens, size reduction and classification equipment, mixing systems, a dust collector, and other supporting equipment. Volatile organic compound emissions from the mixing systems and some of the ovens are vented to an air pollution control equipment regenerative thermal oxidizer.

Pursuant to Title V of the federal Clean Air Act and SCAQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, the above facility has submitted a Title V renewal application and requested the SCAQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information provided in the facility's Title V renewal application and all rules and regulations that are currently applicable to the facility.

The proposed permit is available for public review at the SCAQMD, 21865 Copley Dr., Diamond

Bar, CA 91765 and at the Anaheim Central Library, 500 W. Broadway, Anaheim, CA 92805. Information regarding the facility owner's compliance history submitted to the SCAQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the SCAQMD based on credible information, is also available from the SCAQMD for public review.
