This is an existing facility applying for a Title V permit renewal that is engaged in the manufacturing of polymer concrete products. The facility operates various spray booths, blending/mixing equipment, storage tanks, baghouses and other supporting equipment. Volatile organic compound emissions from a spray booth and two mixers are vented to an air pollution equipment regenerative thermal oxidizer.

Pursuant to Title V of the federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, each of the above facilities has submitted a Title V renewal application and requested the AQMD to renew their Title V permit. Each of the proposed permits incorporates updates to the facility information provided in the facility's Title V renewal application and all rules and regulations that are currently applicable to the facility.

The proposed permits are available for public review at the AQMD, 21865 Copley Dr., Diamond Bar, CA 91765 and at the Riverside Public Library, 3581 Mission Inn Avenue, Riverside, CA 92501. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the AQMD based on credible information, is also available from the AQMD for public review.
