**PHILLIPS 66 COMPANY LOS ANGELES REFINERY WILMINGTON PLANT -
PROPANE RAILCAR LOADING PROJECT (A/N 547792)
REQUEST FOR EXPEDITED USEPA REGION IX PERMIT REVIEW**

This letter is to document our request for expediting USEPA review for the referenced project permit. Phillips 66 Company previously requested expedited review of the permit applications pertaining to the referenced project by submitting SCAQMD form 400-XPP with A/N: 547792.

Phillips 66 requests expedited review by USEPA Region IX for the draft permit. The proposed change is consistent with our plans to reduce greenhouse gas production. It will not result in any significant increases in emissions.

This project is urgent to enable the Los Angeles Refinery to quickly respond to current propane market conditions. Since the creation of Phillips 66 (May 1, 2012), the Los Angeles Refinery is no longer part of an integrated oil company. Without the benefit of exploration and production revenue, saleable products are essential to the economic viability of the refinery.

The information contained in this letter is considered confidential business information. If there are any questions, please contact Marshall Waller at (310) 952-6120 or John Matthews at (310) 952-6213.

Sincerely,

A handwritten signature in black ink, appearing to read "M. Waller". The signature is written in a cursive style and extends across the width of the page.

Marshall G. Waller
