### **Background:**

This application (A/N 538321) was submitted for Title V permit renewal on 05/24/2012. The previous Title V permit was renewed on 12/21/2007. The Title V permit for this facility will expire on 12/20/2012.

Title V permit renewal is subject to public notice, therefore, prior to the issuance of the renewed TV permit, the renewed TV permit draft will be sent to the EPA for a 45 day review and a 30 day public notice.

Note:

- 1) There have been no changes to the facility permit since the last revision dated 3/6/2012.
- 2) Since the engines at this facility are subject to Compliance Assurance Monitoring (CAM) requirements under Reg. XXX (40 CFR Part 64) for Non-Methane Hydrocarbons (NMHC), a CAM plan was filed on 3/12/2013 (A/N 548538). The above CAM plan has been evaluated and an approval has been recommended (see A/N 548538). Facility permit Section D was revised to include CAM requirements for engines 1 & 2 under P/O #s G17021 & G17023.
