San Francisco, CA 94105

Dear Mr. Rios:

Proposed Minor Revision to the Title V Permit for BP West Coast Products, LLC/ARCO Vinvale Terminal (ID#800396)

Enclosed for your 45-day review is a proposed revision to the Title V Permit for the BP West Coast Products, LLC/ARCO Vinvale Terminal located at 8601 S. Garfield Avenue, South Gate, CA 90280. This revision is a Minor Permit Revision, and a Title V public notice is not required. The proposed revision to Section D is enclosed, and the engineering evaluation for the two permit applications shown below, are enclosed.

SECTION D: PERMIT TO OPERATE

Appl. No./ Permit No.	Description
442943/ G24098	Revise the Permit to Operate for Domed External Floating Roof Storage Tank No. 931: <ul style="list-style-type: none"> <li>• Remove Condition #3: Tank throughput limit of 6,000,000 gallons per month for Tank 931.</li> <li>• Add Facility-wide Condition #3: Total combined throughput limit for all product storage tanks (Tank Numbers 930, 931, 932, 933, 934, 940, 941, 942, 943, 950 and 951) of 181,145,741 gallons in any one calendar month.</li> </ul>
472717/ G24099	Revise the Permit to Operate Domed External Floating Roof Storage Tank No. 942: <ul style="list-style-type: none"> <li>• Remove Condition #3: Tank throughput limit of 34,000,000 gallons per month for Tank 942.</li> <li>• Add Facility-wide Condition #3: Total combined throughput limit for all product storage tanks (Tank Numbers 930, 931, 932, 933, 934, 940, 941, 942, 943, 950 and 951) of 181,145,741 gallons in any one calendar month.</li> </ul>

The last revision to the Title V permit for this facility was issued on May 1, 2013. That permit revision included new Permits to Operate for Storage Tanks 931 and 942, which included throughput limits on each tank. BP West Coast Products, LLC/ARCO Vinvale Terminal filed an objection to the throughput limits on these two tanks, and subsequently agreed to a total combined throughput limit for all product storage tanks at this facility (Tank Numbers 930, 931, 932, 933, 934, 940, 941, 942, 943, 950 and 951) of 181,145,741 gallons in any one calendar month. This total combined tank throughput limit is equal to the truck loading throughput limit at this facility (5,843,411 gallons per day for all products times 31 days per month = 181,145,741 gallons per month). The proposed changes will result in no VOC emission increase.

Mr. Gerardo Rios
