AIR QUALITY MANAGEMENT DISTRICT

2525 DOMINIC DRIVE, SUITE J CHICO, CALIFORNIA 95928
TELEPHONE: (530) 891-2882 FAX: (530) 891-2878

PERMIT

NO. SPP-75-40
AMENDED 02-29-08

IS HEREBY GRANTED TO

SFPP, L.P., Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

Hydrocarbon Vapor Processing System

Loading Rack 1-North	Six (6) Gasoline Loading Arms and Two (2) Diesel Fuel Loading Arms with Two (2) Vapor Return Lines
Loading Rack 1-South	Four (4) Gasoline Loading Arms and Three (3) Diesel Fuel Loading Arms with Two (2) Vapor Return Lines
Loading Rack 3-North	Four (4) Gasoline Loading Arms, Two (2) Diesel Fuel Loading Arms, and Two (2) Reserve, Sealed Loading Arm Spots with Two (2) Vapor Return Lines
Loading Rack 3-South	Four (4) Gasoline Loading Arms, Two (2) Transmix Loading Arms, and Two (2) Diesel Fuel Loading Arms with Two (2) Vapor Return Lines
Loading Rack 4-North	Three (3) Gasoline Loading Arms and One (1) Diesel Fuel Loading Arm with Two (2) Vapor Return Lines
Loading Rack 4-South	Three (3) Gasoline Loading Arms and Two (2) Diesel Fuel Loading Arms with Two (2) Vapor Return Lines
Loading Rack 5-East	Six (6) Gasoline Loading Arms and Two (2) Diesel Fuel Loading Arms with Four (4) Vapor Return Lines

One (1) Vapor Holder Tank (CH-2), and One (1) John Zink Company Model GV-ZTOF-5300-2 Enclosed Flare Vapor Combustor

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is May 31, 2007.
5. This permit is effective on the anniversary date set forth in condition #4, and shall be renewable annually upon payment of required permit fees.

REVOCABLE AND NON-TRANSFERABLE

DATE: 5-31-07

AMENDED: 02-29-08

6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the APCO, with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.
12. In the event a new owner or operator assumes the control of the subject facility, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staffs are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.

REVOCABLE AND NON-TRANSFERABLE

DATE: 5-31-07

AMENDED: 02-29-08

21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The District shall be notified within twenty-four (24) hours of detection of any soil contamination due to a product spill or equipment leak exceeding one (1) barrel. Soil remediation measures may require an Authority to Construct Permit and a Permit to Operate, as determined by the APCO.
23. The vapor recovery system shall operate in accordance with the manufacturer's specifications and maintained to be leak-free, vapor-tight, and in good working order. Gasoline, diesel fuel, ethanol, or other petroleum-based products (product) shall not be dispensed at the loading racks unless the vapor recovery system is fully operational.
24. All tanks, valves, flanges, piping and associated equipment shall be maintained to be leak-free (liquid and vapor) and vapor-tight. A liquid leak-free condition shall be defined as a leak of less than three (3) drops per minute. A vapor leak shall be defined as any source of gasoline vapors which causes a combustible gas detector meter reading of 100 percent of the LEL (Lower Explosive Limit). A vapor leak does not include any vapor resulting from liquid spillage or liquid leaks. Vapor-tight shall be defined as either a leak of less than 100 percent of the LEL on a combustible gas detector measured at a distance of one (1) inch from the source or no visible evidence of air entrainment in the sight glass of a liquid delivery hose.
25. The vapor flow rate to the vapor combustor shall not exceed 700 cubic feet per minute (cfm).
26. All product shall be loaded using one of the following operational modes:
 - a. Normal Mode: Vapors from truck loading are stored in the vapor holder and burned in the vapor combustor.
 - b. Direct Mode: Vapors from truck loading are processed directly by the vapor combustor. The vapor holder is out-of-service and not storing any vapors.
27. During the Direct mode of operation, the simultaneous use of more than eight (8) loading arms at any time is prohibited. Written notice of this limitation shall be posted in the control room. (Amended 02-29-08)
28. Pursuant to the California Air Resources Board Certification Source Test, no more than 1,300,000 gallons of gasoline shall be dispensed from the bulk terminal in any twenty-four (24) hour period when operating in the Direct mode. (Amended 02-29-08)
29. Pursuant to the California Air Resources Board Certification Source Test, no more than 1,800,000 gallons of gasoline shall be dispensed from the bulk terminal in any twenty-four (24) hour period when operating in the Normal mode. (Amended 02-29-08)
30. Pursuant to the California Air Resources Board Certification Source Test, no more than 2,700,000 gallons of product shall be dispensed from the bulk terminal in any twenty-four (24) hour period. (Amended 02-29-08)
31. The processing of vapors resulting from the loading of product in either the Normal or Direct mode of operation shall not occur if the non-methane hydrocarbon concentration in the effluent gas stream from the stack of the vapor combustor is greater than any of the limits specified in this permit. The continuous emissions monitor shall be used with a six (6) hour averaging period for compliance purposes.
32. The vapor holder tank shall be prevented from venting to the atmosphere by controlling the product loading operations so as to not exceed the effective capacity of the vapor recovery system and the vapor holder at any time.
33. The vapor holder tank shall be taken out of service if vapors are vented to the atmosphere. The District shall be notified within a two (2) hour time period if the vapor holder is taken out of service.
34. The permit holder shall maintain, calibrate and operate an automatic rack shutdown switch. The vapor pressure monitoring system shall alarm and automatically shutdown the loading racks when the pressure monitor indicates 5 inches of water column gage of vapor line pressure when operating in Normal mode. The vapor pressure monitoring system shall alarm and automatically shutdown the loading racks when the pressure monitor indicates 12 inches of water column gage of vapor line pressure when operating in Direct mode.

DATE: 5-31-07

AMENDED: 02-29-08

EMISSION LIMITATIONS CONDITIONS

35. Emission concentration and rate limits may be adjusted based upon source test and California Air Resources Board (CARB) certification test data. A copy of the most recent CARB Executive Order and certification test summary shall be made available to the APCO or his designated representative upon request.
36. The gaseous emissions from the vapor combustor shall be limited to the following concentrations and rates:
 - a. Non-methane hydrocarbon emissions, expressed as propane, shall not exceed 0.080 pounds per 1,000 gallons of product loaded.
 - b. Non-methane hydrocarbon emissions, expressed as propane, shall not exceed 200 parts per million (ppm).

A six (6) hour averaging period will be used for compliance purposes.
37. The non-methane hydrocarbon Potential to Emit for the vapor combustor corresponding to a product loading rate of approximately 7,540,344 gallons/day and emission limit of 0.08 lbs VOC/ 1000 gallons product loaded is 603.22 lbs./day or 55,082 lbs/quarter or 110.16 TPY. (Amended 02-29-08)

MONITORING AND REPORTING CONDITIONS

38. The permit holder shall maintain, calibrate, and operate the following continuous monitors (CEMs):
 - a. Vapor combustor stack hydrocarbon monitor; and
 - b. Vapor line pressure monitor.

These monitors shall meet all applicable federal design and quality assurance requirements. The chart printouts for each of the above devices shall be clearly labeled as to present scale setting, current time and the proper units to be used in evaluating the recording.
39. The stack hydrocarbon concentrations shall be recorded in parts per million (ppm) and expressed as propane.
40. The stack hydrocarbon monitor shall be in operation at all times, except when vapors are being stored in the vapor holder without further processing.
41. The permit holder shall maintain records of the total quantity of all gasoline and product loaded per day. (Amended 02-29-08)
42. Continuous monitor records, maintenance records and reports generated by the facility or its representatives regarding the physical integrity of all pumps, valves, flanges and seals and associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to the APCO or his appointed representative upon request.

SOURCE TESTING CONDITIONS

43. A source performance test shall be conducted on the vapor combustor stack in both the Normal and Direct modes of operation on an annual basis.
44. A source test protocol shall be submitted to the APCO for approval at least thirty (30) days prior to the scheduled source test date.
45. All test methods and procedures shall follow EPA guidelines unless otherwise approved by the APCO, in writing, prior to the scheduled test date.
46. The APCO shall be notified at least ten (10) days prior to the scheduled test.
47. Source performance testing ports, platforms, and access ladders shall be provided on the stack and shall conform to the Air Resources Board and Occupational Safety and Health Administration standards. Sampling ports shall be located in accordance with standard CARB and EPA methodology and procedures.
48. The results of the source test shall be submitted to the APCO within sixty (60) days following the test, unless an alternative schedule is approved by the APCO in writing. (Amended 02-29-08)
49. The vapor combustor shall be source tested at the maximum attainable vapor flow rate, not to exceed 700 cfm.

REVOCABLE AND NON-TRANSFERABLE

TELEPHONE: (530) 891-2882 FAX: (530) 891-2878

PERMIT

NO. SPP-99-39

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) Oil/Water Separator, Associated Bag Filters, Two (2) 12,000 Gallon Aboveground Process Water Storage Tanks, in-series, (Enclosed with Pressure Relief Valves for Control of VOCs), and Three (3) 2,000 Gallon Aboveground Portable Baker Tanks, in-series, (Enclosed with Pressure Relief Valves for Control of VOCs) [Petroleum Products Removed From The Oil/Water Separator Are Routed to Transmix Tank CH-19 for Storage]; Three (3) 2,000 Pound Liquid-Phase Granular Activated Canisters (In-Series) and Two (2) 11,000 Gallon Open-Top Visual Inspection Tanks (In-Series) with One (1) 3-hp Blower (Process Water from the Oil/Water Separator is Filtered Through the Carbon Canisters for Removal of TPHg, TPHd, Benzene and other Contaminants, and is discharged into the Open-Face Visual Inspection Tanks)

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Officer (APCO), or his appointed representative upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the APCO, with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to condition #12 of this permit.

REVOCABLE AND NON-TRANSFERABLE

10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.
12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action can not remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The liquid-phase GAC canisters shall provide a minimum removal efficiency of 99% by weight of both total petroleum as gasoline (TPHg), and total petroleum hydrocarbons as diesel (TPHd). The GAC canister removal efficiency shall be determined on a monthly basis through analysis of water samples of the influent, mid-point, and effluent from the carbon treatment portion of the process water treatment system.
23. The total volume of water treated shall not exceed 433,200 gallons for any consecutive thirty (30)-day period. The permit holder shall measure and record the daily volume of contaminated water processed through the treatment system. Such records shall be maintained for a period of five (5) years and shall be made available for inspection by the APCO, or his appointed representative, upon request.

MONITORING AND REPORTING CONDITIONS

24. The permit holder shall measure the pollutant concentrations in the influent water, between the two granular activated carbon (GAC) canisters, and the effluent water of the treatment system. Water samples shall be taken and analyzed for total petroleum hydrocarbons as gasoline (TPHg), total petroleum hydrocarbons as diesel (TPHd), benzene, toluene, ethyl-benzene, and xylene (BTEX) on a monthly basis. Any deviation from this requirement shall require prior written approval from the APCO. All samples shall be analyzed by a state-certified laboratory.
25. The permit holder shall replace the primary GAC canister upon determination that breakthrough of contaminants has occurred, based upon the results of the monthly water samples. Breakthrough is defined as measured levels of TPHg or TPHd above the level of detection in water samples taken after treatment by the primary GAC canister and before entering the secondary GAC canister.

RECORDKEEPING REQUIREMENTS

26. The sampling procedures stipulated in condition #24 of this permit shall be followed each time that either of the GAC canisters is replaced. The permit holder shall maintain a log recording of the date and time that each GAC canister is moved or replaced. Such records shall be maintained for a period of five (5) years and shall be made available for inspection by the APCO, or his appointed representative, upon request.
27. The source shall designate a responsible person to certify that District-requested production and throughput date is accurate and timely.
28. The permit holder shall maintain adequate production records to verify the actual air emissions of each regulated air pollutant. The permit holder shall keep a monthly log of hours of operation, purchase orders, invoices, fuel certifications, and/or other documents as necessary to support the information recorded. Production records shall include:
 - a. Hours of operation per year.
29. Production records shall be:
 - a. Submitted to the APCO on an annual basis within thirty (30) days after the first day of each calendar year on the production data form provided or other signed document containing the information required above;
 - b. Maintained on-site for a period of five (5) years; and,
 - c. Made available for inspection within twenty-four (24) hours of request by the APCO, or his designated representative.
30. Upon request of the APCO, the permit holder shall provide an annual operating summary of any and all equipment malfunctions (upset or breakdown conditions) that may have resulted in an increase in air emissions during the previous calendar year. The annual operating summary shall itemize equipment upset or breakdown conditions by the date, time and duration of the upset or breakdown condition and shall also include the estimated emission release of any air pollutants.

NO. SPP-80-30
Amended 10-26-07

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 33,000 Barrel Gasoline Storage Tank (CH-30) with Pan-Type Welded Internal Floating Roof with a
Liquid-Mounted Resilient Primary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and

REVOCABLE AND NON-TRANSFERABLE

DATE: 9-30-07 (Amended 10-26-07)

Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-03

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 9,000 Barrel Diesel Fuel Storage Tank (CH-3) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-04

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 27,415 Barrel Gasoline Storage Tank (CH-4) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.

REVOCABLE AND NON-TRANSFERABLE

11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.
12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) and any contractor or subcontractor performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

NO. SPP-81-05

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 9,098 Barrel Gasoline Storage Tank (CH-5) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-06

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 12,890 Barrel Gasoline Storage Tank (CH-6) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-08

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 30,140 Barrel Gasoline Storage Tank (CH-8) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.

REVOCABLE AND NON-TRANSFERABLE

11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.
12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-09

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 12,890 Barrel Gasoline Storage Tank (CH-9) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

NO. SPP-81-10

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 12,000 Barrel Diesel Fuel Storage Tank (CH-10) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-11

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 20,140 Barrel Gasoline Storage Tank (CH-11) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) and any contractor or subcontractor performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

Chico, CA 95928

TO OPERATE

One (1) 8,080 Barrel Gasoline Storage Tank (CH-12) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-13

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 5,040 Barrel Alcohol Storage Tank (CH-13) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one (1) barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-14

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 10,100 Barrel Diesel Fuel Storage Tank (CH-14) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 15,500 Barrel Diesel Fuel Storage Tank (CH-15) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-16

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 10,100 Barrel Gasoline Storage Tank (CH-16) with Pontoon-Type Welded External Floating Roof with a
Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 12,890 Barrel Gasoline Storage Tank (CH-17) with Pontoon-Type Welded External Floating Roof with a
Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-18

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 3,000 Barrel Transmix Storage Tank (CH-18) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Rim-Mounted Steel Compression Plate with Single Wiper Secondary Seal

SUBJECT TO FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-19

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 3,020 Barrel Transmix Storage Tank (CH-19) with Pontoon-Type Welded Internal Floating Roof with a Mechanical Shoe Primary Seal and Steel Compression Plate Secondary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-20

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 10,100 Barrel Diesel Fuel Storage Tank (CH-20) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-22

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 12,980 Barrel Gasoline Storage Tank (CH-22) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and

REVOCABLE AND NON-TRANSFERABLE

Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-23

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 10,100 Barrel Gasoline or Transmix Storage Tank (CH-23) with Pontoon-Type Welded External Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-24

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 10,000 Barrel Diesel Fuel Storage Tank (CH-24) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

Chico, CA 95928

TO OPERATE

One (1) 10,000 Barrel Gasoline Storage Tank (CH-25) with Pontoon-Type Welded Internal Floating Roof with a Vapor-Mounted Resilient Primary Seal and Double Wiper Secondary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

DATE: 9-30-07

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-26

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 10,000 Barrel Diesel Fuel Storage Tank (CH-26) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-27

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 20,000 Barrel Diesel Fuel Storage Tank (CH-27) with Fixed Cone Roof

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-28

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 20,000 Barrel Gasoline Storage Tank (CH-28) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal and a Rim Mounted Compression Plate with Single Wiper Secondary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-29

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 20,000 Barrel Gasoline Storage Tank (CH-29) with Pan-Type Welded Internal Floating Roof with a
Liquid-Mounted Resilient Primary Seal

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

DATE: 9-30-07

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-81-31

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 13,100 Barrel Gasoline or Ethanol Storage Tank (CH-31) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal and a Rim Mounted Compression Plate with Single Wiper Secondary Seal and Ethanol Unloading System consisting of Two (2) Flexible Unloading Hoses 4 Inch in Diameter, Two (2) Pump Sleeves, Two (2) Pumps to Transfer Denatured Ethanol, and One (1) Crispin Valve

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.

REVOCABLE AND NON-TRANSFERABLE

11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.
12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) and any contractor or subcontractor performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one (1) barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

NO. SPP-77-32

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 36,799 Barrel Gasoline Storage Tank (CH-32) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

DATE: 9-30-07

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-77-33

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 25,000 Barrel Gasoline Storage Tank (CH-33) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and

REVOCABLE AND NON-TRANSFERABLE

Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-87-36

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 60,000 Barrel Diesel Fuel Storage Tank (CH-36) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.

PERMIT

NO. SPP-87-37

IS HEREBY GRANTED TO

SFPP, L.P. Chico Terminal
2570 Hegan Lane
Chico, CA 95928

TO OPERATE

One (1) 40,000 Barrel Gasoline Storage Tank (CH-37) with Pan-Type Welded Internal Floating Roof with a Metallic Shoe Primary Seal and Steel Compression Plate Secondary Seal.

SUBJECT TO THE FOLLOWING CONDITIONS

GENERAL CONDITIONS

1. An Authority to Construct Permit and/or Permit to Operate is required before any person, including any contractor or subcontractor, builds, erects, alters or replaces any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, including any soil or water contamination or remediation activity that has the potential to emit any air contaminant.
2. Operation of this equipment listed on this permit must be conducted in compliance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.
3. This Permit to Operate shall be posted in a conspicuous location at the site and shall be presented to the Air Pollution Control Officer (APCO), or his appointed representative, upon request.
4. The anniversary date for this permit is September 30, 2007.
5. This permit is effective on the anniversary date set forth in Condition #4, and shall be renewable annually upon payment of required permit fees.
6. Acceptance of this permit is deemed acceptance of all conditions as set forth herein. Failure to comply with any condition of this permit or the Rules and Regulations of the Butte County Air Quality Management District (District) or State law is grounds for revocation of this permit.
7. Any violation of any condition of this permit is a violation of District Rules and Regulations and State law.
8. This permit may be amended in writing at any time by the Air Pollution Control Officer (APCO), with or without cause, to ensure compliance of this facility, or to mitigate or abate any public nuisance; such amendments may include, but are not limited to, requirements for additional operating conditions, testing, data collection, reporting or other conditions deemed necessary by the APCO to ensure compliance with District Rules and Regulations or State law.
9. This permit is not transferable from one location to another, from one piece of equipment to another, or from one person to another without prior written consent from the APCO. A transfer of ownership shall be granted as authorized pursuant to Condition #12 of this permit.
10. If any provision or condition of this permit is found invalid, such finding shall not affect the validity or enforcement of the remaining provisions.
11. The permit holder shall comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588), pursuant to California Health and Safety Code Section 44300 et. seq.

REVOCABLE AND NON-TRANSFERABLE

12. In the event the control of the subject facility is assumed by a new owner or operator, the APCO shall be notified of such transfer by the submittal of a written request for transfer of this permit by the new owner or operator within thirty (30) days of the transfer.
13. The "Right of Entry", as delineated by the California Health & Safety Code Section 41510 of Division 26, shall apply at all times, and during any time when the equipment is in operation, and during reasonable daylight hours when the equipment is not in operation.

OPERATIONAL CONDITIONS

14. The facility to which this permit is issued is *strictly liable* for assuring that the operating staff are advised and familiar with all conditions contained in the permit.
15. Permit requirements apply to the facility owner and/or operator(s) *and any contractor or subcontractor* performing any activity authorized under this permit. Any person(s), including contractor(s) and/or subcontractor(s), not in compliance with the applicable permit requirements are in violation of State and local laws and subject to appropriate civil and criminal penalties. The facility owner and/or operator, and all contractor(s) or subcontractor(s) are *strictly liable* for the actions and violations of their employee(s). Any violation committed by a contractor or subcontractor shall be considered a violation by the facility owner and/or operator, and the contractor and/or any subcontractor(s).
16. The physical integrity of all process and air pollution control equipment shall be maintained as necessary to ensure compliance with District Regulations and emission limitations set forth in the permit.
17. Modification or alteration of the equipment or operations described in this permit, including a change in the method of operation or a change in location, may occur only when approved in writing by the APCO prior to the implementation of such modification or change. For the purposes of this condition, the term "modification" shall be defined as set forth in District Rule 430. Unless otherwise specified by the APCO in writing, any and all alterations shall require submittal and approval of an Authority to Construct permit application.
18. The APCO shall be notified immediately, and in no event later than two (2) hours from the time of discovery, of any upset or breakdown or malfunction which occurs with the equipment under permit, or emissions exceeding any of the limits established in District Rules and Regulations or the level of emissions for which a permit or variance was granted. Excess emissions shall be reported in accordance with the requirements of District Rule 266 and failure to do so constitutes a willful violation of District Rules.
19. Upon detection, an upset or breakdown condition, which causes or may cause a violation of the emissions limitations as set forth in District Rules, or as a condition of this permit, shall be corrected immediately. In the event that corrective action cannot remedy the emissions violation, the operation of the subject equipment shall be terminated.
20. The APCO shall be provided, upon request, with any and all emissions related data collected as a result of the permitted activity, including data collected or obtained as required by other regulatory agencies.
21. The facility shall maintain the permitted equipment in compliance with federal and State Occupational Safety and Health Administration requirements so as to ensure the health and safety of District representatives performing a site inspection.
22. The APCO shall be notified within 24 hours of detection of any soil contamination due to a product spill or equipment leak exceeding one barrel. Soil remediation measures may require an Authority to Construct and a Permit to Operate, as determined by the APCO.
23. Maintenance records and reports generated by the permit holder, or by any representatives acting on behalf of the permit holder, regarding the physical integrity of all pumps, valves, flanges and seals associated with the equipment under permit shall be maintained on site for at least five (5) years and made available to District staff upon request.
24. A California Air Resources Board (CARB) certified vapor recovery system shall be used on all product transfer operations.
