The District proposed a reopening of the MFR permit for this facility on August 26, 2004. This reopening was required to incorporate the MSW Landfill NESHAP requirements (40 CFR Part 63, Subparts A and AAAAA) that were promulgated by EPA on January 16, 2003 and related permit condition revisions. In addition, the District proposed administrative amendments and minor revisions to this permit to correct title page information, update citations and dates based on SIP approvals and other regulatory changes, correct errors, and clarify language. The changes to the permit are described in detail in Section X Revision History of the MFR Permit.

The proposed revisions did not result in any emission increases. No comments on these proposed revisions were received from EPA, the public, or the facility.

Enclosed for your information is a copy of the final permit. If you have any questions regarding this permit, please call Steve A Hill, Air Quality Engineering Manager, at (415) 749-4673.

Sincerely yours,

Signed by Peter Hess for _____
