Ms. Deborah Jordan  
Director, Air Division  
United States Environmental Protection Agency  
75 Hawthorne Street  
San Francisco, CA 94105

Re: Revision of Synthetic Minor Permit for Facility A0055,  
Lockheed Martin Space Systems Company

Dear Ms. Jordan:

This is to inform you that the District is issuing a revision to the synthetic minor operating permit for the facility referenced above.

In response to the facility's request, the facility-wide emission limit for POC has been changed from 50 tons per year to 35 tons per year. The District has made the facility-wide NOx emission limit of 62 tons per year a condition limit rather than limiting the amount of combustion of fuel. A gasoline dispensing facility and emergency standby engines have been added to the permit.

The revision is effective as of the date of this letter. The synthetic minor permit evaluation and conditions are attached.

The District will also notify the California Air Resources Board and the facility in writing of this permit action.

If you have any questions regarding this matter, please call Jim Karas, Air Quality Engineering Manager, at (415) 749-4742.

Very truly yours,

Jack P. Broadbent  
Executive Officer/APCO
