Facility ID# 171329

Facility Contact Person:

This is an existing facility applying for a Title V permit renewal. This is a bulk terminal which stores and distributes petroleum products. The facility operates storage tanks and tank truck loading racks which store and load petroleum products in tank trucks.

Pursuant to Title V of the federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such a permit has been renewed. Accordingly, the above facility submitted a Title V permit renewal application and requested the AQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information, as provided in the facility's Title V renewal application, as well as updates to all rules and regulations that are currently applicable to the facility.

As required by Title V of the federal Clean Air Act, the Title V permit includes all the emission limits, applicable requirements and operating conditions on the equipment. Title V facilities are required to certify compliance with the Title V permits in addition to recordkeeping and mandatory reporting of any deviation of the permit conditions.

The proposed permit is available for public review at AQMD, 21865 Copley Dr., Diamond Bar, CA 91765 and at the Bloomington Branch Library, 993 Valley Boulevard, Suite 102, Bloomington, CA 92316. The proposed permit can also be viewed at
