**Re: Notice of Minor Title V Permit Modification
District Facility # N-2107
Project # N-1093729**

Dear Mr. McMurtry:

Enclosed is the District's analysis of your application for minor Title V permit modification for the facility identified above. You proposed a Title V minor permit modification to incorporate recently issued Authorities to Construct N-2107-9-12 and '12-1 into the Title V operating permit. Authority to Construct N-2107-9-12 is for the removal of a backup thermal oxidizer from the applicant's existing animal rendering line. Authority to Construct N-2107-12-1 is for a new meat meal loadout operation.

Enclosed is the engineering evaluation with the following attachments: proposed modified Title V permit, recently issued Authorities to Construct N-2107-9-12 and '12-1, emission increases, application, and previous Title V permit. This project will be subject to a 45-day EPA commenting period prior to the District taking final action.

Thank you for your cooperation in this matter. If you have any questions, please contact Mr. Rupi Gill at (209) 557-6400.

Sincerely,

David Warner
Director of Permit Services

Re: **Notice of Minor Title V Permit Modification**
District Facility # N-2107
Project # N-1093729

Dear Mr. Rios:

Enclosed for you to review is an application for minor Title V permit modification for the facility identified above. Darling International Inc. is proposing a Title V minor permit modification to incorporate the recently issued Authorities to Construct N-2107-9-12 and '-12-1 into the Title V operating permit. Authority to Construct N-2107-9-12 is for the removal of a backup thermal oxidizer from the applicant's existing animal rendering line. Authority to Construct N-2107-12-1 is for a new meat meal loadout operation.

Enclosed is the engineering evaluation with the following attachments: proposed modified Title V permit, recently issued Authorities to Construct N-2107-9-12 and '-12-1, emission increases, application, and previous Title V permit. Please submit your written comments on this project within the 45-day comment period that begins on the date you receive this letter.

Thank you for your cooperation in this matter. If you have any questions, please contact Mr. Rupi Gill at (209) 557-6400.

Sincerely,

David Warner
Director of Permit Services

TITLE V APPLICATION REVIEW

Minor Modification
Project #: N-1093729

Engineer: James Harader
Date: January 10, 2011

Facility Number: N-2107
Facility Name: Darling International Inc.
Mailing Address: PO Box 1608
Turlock, CA 95381

Contact Name: William McMurtry
Phone: (972) 281-4409

Responsible Official: William McMurtry
Title: VP of Environmental Affairs

I. PROPOSAL

Darling International Inc. is proposing a Title V minor permit modification to incorporate Authorities to Construct N-2107-9-12 and N-2107-12-1 into the existing Title V operating permit.

The purpose of this evaluation is to identify all applicable requirements, determine if the facility will comply with the applicable requirements and to provide the legal and factual basis for the proposed revisions.

II. FACILITY LOCATION

This facility is located at 11946 Carpenter Rd in Crows Landing, CA.

III. EQUIPMENT DESCRIPTION

N-2107-9-14: ANIMAL RENDERING OPERATION INCLUDING SEVEN DUPPS PRE-HEAT COOKERS, A HAARSLEV 2564 COOKER AND AIR-COOLED CONDENSER SERVED BY A 3.0 MMBTU/HR NATURAL GAS-FIRED GULF COAST ENVIRONMENTAL REGENERATIVE THERMAL OXIDIZER (RTO) WITH AN UNFIRED WASTE HEAT RECOVERY BOILER AND A VENTURI SCRUBBER PRIOR TO THE RTO

N-2107-12-1: MEAT AND BONE MEAL LOADOUT OPERATION WITH ONE 104 TON STORAGE/LOADOUT BIN, THREE 84 TON STORAGE/LOADOUT BINS, AND ONE 450 TON STORAGE/LOADOUT BIN

IV. SCOPE OF EPA AND PUBLIC REVIEW

This change to a Title V permit is considered to be a minor modification and, as such, requires no public review.

V. APPLICABLE REQUIREMENTS

District Rule 2520, Federally Mandated Operating Permits (Adopted June 21, 2001)

VI. DESCRIPTION OF PROPOSED MODIFICATIONS

N-2107-9-14

The applicant is proposing to incorporate Authority to Construct N-2107-9-12 into their existing Title V permit. This Authority to Construct was issued to allow the facility to remove an existing thermal oxidizer that only served as a back-up for the primary regenerative thermal oxidizer (RTO) that serves a rendering operation. The animal rendering operation will continue to be controlled by a regenerative thermal oxidizer, and the revised permit will not allow processing of material when the regenerative thermal oxidizer is not in service.

The following changes will be made to the TV permit due to the implementation of Authority to Construct N-2107-9-12:

Conditions #6, #7, and #8, and #14 of Draft Permit to Operate N-2107-9-13 are solely applicable to the backup thermal oxidizer. Since the backup thermal oxidizer is being removed, these conditions will be removed from the TV permit and will not be listed on Permit to Operate N-2107-9-14.

Conditions #9, #10, #11, #12, and #13 of Draft Permit to Operate N-2107-9-13 list requirements that were common to both the primary RTO and the backup thermal oxidizer. Reference to the backup thermal oxidizer will be removed. The revised conditions are included on Permit to Operate N-2107-9-14 as Conditions #5, #8, #9, #10 and #11.

Authority to Construct, N-2107-9-12, Condition #1 requires the facility to submit a minor modification application within the appropriate timeframes and procedures as outlined in District Rule 2520. This requirement has been satisfied.

Authority to Construct, N-2107-9-12, Condition #2 requires ATC N-2107-9-11 to be implemented prior to or concurrently. This condition has been satisfied.

Authority to Construct, N-2107-9-12, Conditions #3 and #4 are already listed on the facility-wide permit, N-2107-0. Therefore, these conditions will not be included on Permit to Operate N-2107-9-14.

Authority to Construct N-2107-9-12 Conditions # 11 and #17 are new. These conditions limit the quantity of raw material that may be processed and require recordkeeping. The revised conditions are included on Permit to Operate N-2107-9-14 as Conditions #7 and #13.

N-2107-12-2

The applicant is proposing to incorporate Authority to Construct N-2107-12-1 into their existing Title V permit. This Authority to Construct is for a new meat and bone meal loadout operation, and replaces previously issued ATC N-2107-12-0. The following changes will be made to the TV permit due to the implementation of Authority to Construct N-2107-12-1:

Authority to Construct N-2107-12-1, Condition #1 requires Authority to Construct N-2107-12-0 to be cancelled upon implementation. This requirement has been satisfied.

Authority to Construct, N-2107-12-1, Condition #2 requires the facility to submit a minor modification application within the appropriate timeframes and procedures as outlined in District Rule 2520. This requirement has been satisfied.

All other requirements proposed by Authority to Construct N-2107-12-1 are new and will be included in the proposed TV permit, N-1252-12-2.

VII. COMPLIANCE

In accordance with Rule 2520, 3.20, these modifications:

1. Do not violate requirements of any applicable federally enforceable local or federal requirement;
2. Do not relax monitoring, reporting, or recordkeeping requirements in the permit and are not significant changes in existing monitoring permit terms or Conditions;
3. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;
4. Do not seek to establish or change a permit term or Condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject. Such terms and Conditions include:
 - a. A federally enforceable emission cap assumed to avoid classification as a modification under any provisions of Title I of the Federal Clean Air Act; and
 - b. An alternative emissions limit approved pursuant to regulations promulgated under section 112(i)(5) of the Federal Clean Air Act; and
5. Are not Title I modifications as defined in District Rule 2520 or modifications as defined in section 111 or 112 of the Federal Clean Air Act; and
6. Do not seek to consolidate overlapping applicable requirements.

In accordance with Rule 2520, the application meets the procedural requirements of section 11.4 by including;

1. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
2. The source's suggested draft permit; and
3. Certification by a responsible official that the proposed modification meets the criteria for use of minor permit modification procedures and a request that such procedures be used.

VIII. ATTACHMENTS

Proposed Modified Title V Operating Permits
No.
N-2107-9-14 and 12-2

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2107-9-14

EXPIRATION DATE: 08/31/2009

EQUIPMENT DESCRIPTION:

ANIMAL RENDERING OPERATION INCLUDING SEVEN DUPPS PRE-HEAT COOKERS, A HAARBLEV 2564 COOKER AND AIR-COOLED CONDENSER SERVED BY A 3.0 MMBTU/HR NATURAL GAS-FIRED GULF COAST ENVIRONMENTAL REGENERATIVE THERMAL OXIDIZER (RTO) WITH AN UNFIRED WASTE HEAT RECOVERY BOILER AND A VENTURI SCRUBBER PRIOR TO THE RTO

PERMIT UNIT REQUIREMENTS

1. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
2. The concentration of sulfur compounds in the exhaust from this unit shall not exceed 0.2% by volume as measured on a dry basis over a 15 minute period. [District Rules 2520, 9.3.2, 4801 and Stanislaus County Rule 407] Federally Enforceable Through Title V Permit
3. Tallow and yellow grease storage tanks shall be kept in good operating condition. These tanks shall not contribute to a nuisance condition. [District Rule 4102]
4. The differential pressure gauge reading range for the venturi scrubber prior to the regenerative thermal oxidizer shall be established per manufacturer's recommendation at time of start up inspection. [District Rule 2201] Federally Enforceable Through Title V Permit
5. The RTO shall only be fired on PUC-regulated natural gas. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The emissions from the 3.0 MMBtu/hr RTO exhaust shall not exceed any of the following limits: 2.94 lb NOx/hr, 3.36 lb CO/hr, 3.32 lb PM10/hr, 2.66 lb SOx/hr, or 0.053 lb VOC/hr (based on a 30 minute averaging period). [District Rule 2201] Federally Enforceable Through Title V Permit
7. The total facility raw material process rate shall not exceed 1,650,000 pounds per day. [District Rule 2201] Federally Enforceable Through Title V Permit
8. The RTO shall be operated at a temperature of no less than 1400 degrees Fahrenheit and the retention time is to be no less than 1 second. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit
9. The temperature in the RTO shall be monitored and continuously recorded while in operation. The monitoring and recording equipment shall be properly installed, properly maintained and in proper calibration at all times. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit
10. The RTO shall be heated to the proper operating temperature prior to any contaminated process air entering the oxidizer. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit
11. The RTO shall continue to operate after the shut-down of the rendering processes until all contaminated process air is incinerated. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit
12. Facility-wide PM10 emissions shall not exceed 29,200 lbs per year. Operator shall maintain copies of all natural gas fuel invoices, and records of hours of operation of the RTO in order to show compliance with this emissions limit. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

13. The permittee shall keep a record of the daily quantity of the raw material processed at this facility, in pounds. [District Rule 2201] Federally Enforceable Through Title V Permit
14. All records shall be retained for a minimum of five years, and shall be made readily available for District inspection upon request. [District Rules 1070 and 2520, 9.4.2] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-2107-12-2

EXPIRATION DATE: 08/31/2009

EQUIPMENT DESCRIPTION:

MEAT AND BONE MEAL LOADOUT OPERATION WITH ONE 104 TON STORAGE/LOADOUT BIN, THREE 84 TON STORAGE/LOADOUT BINS, AND ONE 450 TON STORAGE/LOADOUT BIN

PERMIT UNIT REQUIREMENTS

1. All loadout material trucks shall be maintained in condition to prevent leakage of solid or liquid material. [District Rule 4102]
2. Equipment shall be operated in such a manner as to not constitute a nuisance or annoyance to a considerable number of people. [District Rule 4102]
3. The District shall have authority to investigate possible odors alleged to originate from the facility and to make a determination of whether or not a nuisance exists, either in response to a complaint or on its own initiative. [District Rule 4102]
4. The District shall have access to the facility at any time to inspect operations, review records or perform other actions to assure compliance. [District Rule 1070] Federally Enforceable Through Title V Permit
5. Total meat and bone meal loaded into delivery trucks shall not exceed 1,200 tons per day. [District Rule 2201] Federally Enforceable Through Title V Permit
6. Emissions from the meat and bone meal loadout operation shall not exceed 3.0 lb PM10/day. [District Rule 2201] Federally Enforceable Through Title V Permit
7. Records required by this permit shall be maintained and retained for at least five years and shall be made readily available for District inspection upon request. [District Rule 1070] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

7. The 17.8 MMBtu/hr thermal oxidizer shall not operate for more than 90 days (2,160 hours) per year, and thereafter shall operate only when the 3.0 MMBtu/hr RTO is experiencing a breakdown condition, and the District has been notified per District Rule 1100. [District Rule 2201] Federally Enforceable Through Title V Permit
8. Permittee shall maintain annual records of the amount of hours the 17.8 MMBtu/hr thermal oxidizer is in operation. [District Rule 2201] Federally Enforceable Through Title V Permit
9. Each thermal oxidizer shall only be fired on PUC-regulated natural gas. [District Rule 2201] Federally Enforceable Through Title V Permit
10. Each thermal oxidizer shall be operated at a temperature of no less than 1400 degrees Fahrenheit and the retention time is to be no less than 1 second. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit
11. Each thermal oxidizer incineration temperature shall be monitored and continuously recorded while in operation. The monitoring and recording equipment shall be properly installed, properly maintained and in proper calibration at all times. [District Rule 4104] Federally Enforceable Through Title V Permit
12. Each thermal oxidizer shall be heated to the proper operating temperature prior to any contaminated process air entering the oxidizer. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit
13. Each thermal oxidizer shall continue to operate after the shutdown of the rendering processes until all contaminated process air is incinerated. [District Rules 2201 and 4104] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

14. The exhaust emissions from the 17.8 MMBtu/hr thermal oxidizer shall not exceed the following: 4.43 lb NO_x/hr, 4.61 lb CO/hr, 2.23 lb PM₁₀/hr, 2.67 lb SO_x/hr, or 0.05 lb VOC/hr (based on a 30 minute averaging period). [District Rule 2201] Federally Enforceable Through Title V Permit
15. The exhaust emissions from the 3.0 MMBtu/hr RTO shall not exceed the following: 2.94 lb NO_x/hr, 3.36 lb CO/hr, 3.32 lb PM₁₀/hr, 2.66 lb SO_x/hr, or 0.053 lb VOC/hr (based on a 30 minute averaging period). [District Rule 2201] Federally Enforceable Through Title V Permit
16. Facility-wide PM₁₀ emissions shall not exceed 29,200 lbs per year. Operator shall maintain copies of all natural gas fuel invoices, and records of hours of operation of both thermal oxidizers in order to show compliance with this emissions limit. [District Rules 2201 and 2520, 9.3.2] Federally Enforceable Through Title V Permit
17. The concentration of sulfur compounds in the exhaust from this unit shall not exceed 0.2% by volume as measured on a dry basis over a 15 minute period. [District Rules 2520, 9.3.2, 4801 and Stanislaus County Rule 407] Federally Enforceable Through Title V Permit
18. All records shall be retained for a minimum of five years, and shall be made readily available for District inspection upon request. [District Rules 1070 and 2520, 9.4.2] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.

DRAFT

ATTACHMENT E

Emission Increases

Emission Increases

Both of these units are part of District Project N-1093707, and were the only Authorities to Construct issued in that project. The information presented in the following table was taken from Project N-1093707 and demonstrates that there was no increases in potential to emit from this proposal. Additionally, it was determined in Project N-1093707 that this project did not trigger a Major Modification or Federal Major Modification.

Pollutant	Pre-Project Stationary Source Emissions	Post-Project Stationary Source Emissions
NO _x	51,457	48,238
SO _x	27,418	27,397
PM ₁₀	29,200	29,200
CO	116,660	113,960
VOC	6,512	6,512
